Abstract		
Chapter 1: Introduction and Review of literature		Pg no.
1.1	Innate Immunity	1-4
	1.1.1. Pathogen associated molecular patterns	1-4
1.2	Toll like Receptors (TLRs) in viral recognition	4-12
	1.2.1 TLR Signaling Pathways	6
	1.2.2 The MyD88-dependent signaling pathway	6-7
	1.2.3 The TRIF-Dependent Signaling Pathway	7-8
	1.2.4 RIG-I like receptors (RLRs) in viral recognition	9-11
	1.2.5 RLR signaling pathway	11-12
1.3	Innate immune response against viruses	12-20
	1.3.1 Antiviral Cytokine Response: Interferons (IFNs)	12-14
	1.3.2 Interferon stimulated genes (ISGs)	14-17
	1.3.3 Virus-induced proinflammatory cytokine/chemokine response	17
	1.3.4 Transcription factors in antiviral response: IRFs, NF- κ B and AP-1	18-20
1.4	Viral Escape Mechanisms	20-23
	1.4.1 Interfering globally with host-cell expression and/or protein synthesis	20-21
	1.4.2 Minimizing IFN induction	21-22
	1.4.3 Inhibition of IFN signalling	22
	1.4.4 Blocking the action of ISGs	23
1.5	Hepatitis E	23-30
	1.5.1 Classification	23-24
	1.5.2 Epidemiology	24-26
	1.5.3 Clinical Feature and Pathogenesis	26-28
	1.5.4 HEV animal model	28-29
	1.5.4.1 Non-human primate models of HEV genotype 1 and 2 infections	28-29
	1.5.4.2 Animal models of HEV genotype 3 and genotype	29-30

			4 infections	
1.6	Cell culture models for HEV			30-31
1.7	HEV biology			31-43
	1.7.1	Proteins Encoded by HEV RNA		32
		1.7.1.1	ORF1	32-37
		1.7.1.2	ORF2	38-39
		1.7.1.3	ORF3	39-41
	1.7.2	HEV replication		41
		1.7.2.1	Cell entry and Receptor	41-42
		1.7.2.2	Uncoating and genome replication	42
		1.7.2.3	Viral egress	42-43
1.8	Immunopathogenesis			43-45
Chapter 2 : Aims and Objectives				46
Chapter 3: Materials and Methods				
3.1	Virus Stock preparation			47
3.2	Cells			47
3.3	Cell infections			48
3.4	Plasmids			48
3.5	HEV replicon plasmids			48-49
3.6	Antibodies			49
3.7	Cell Transfections			49
3.8	Stimulation of cells with poly (I:C)			49
3.9	Immunoblotting			49-50
3.10	Densitometric scanning			50
3.11	Detection of HEV replicative intermediate RNA and proteins			50
3.12	Detection of pORF2 binding to cells by Immunofluorescence and flow cytometry			50-51
3.13	Luciferase assay			51
3.14	Type I IFN assay			51
3.15	siRNA assays			51-52
3.16	<i>In vitro</i> transcription to produce transcripts from HEV replicon plasmids, transfection of hepatoma cells and monitoring of HEV replication			52-53

3.17	Gene Expression profiling by TaqMan Low Density Array (TLDA)	53	
3.18	Quantitative PCR and ELISAs for interferons, cytokines and chemokines	53	
3.19	Treatment of the cells with IFN- α , BX795 inhibitor and anti-IFN- α/β antibodies	54	
3.20	Statistical analysis	54	
Chapter 4 : Results			
4.1	Selection of a cell culture system for studying antiviral pathways	60	
4.2	Innate immune response in cell lines	64	
4.3	Gene expression profile of HEV infected A549 cells	65	
4.4	Detection of secreted type I interferons	72	
4.5	HEV induces proinflammatory cytokines/chemokines in A549 cells	72	
4.6	Activation of IRF3 and NF- κ B in response to HEV infection in A549 cells	75	
4.7	IFN- β and NF- κ B promoter activities	76	
4.8	Signaling adaptors	79	
4.9	Search of a hepatocyte model system for HEV interaction studies	88	
4.10	Evaluation of changes in gene expression in hepatoma cell lines transfected with hepatitis E virus replicon RNA	89	
	4.10.1	Differential replication efficiency of HEV in different hepatoma cell lines	89
	4.10.2	Cell-specific antiviral response to HEV replication	90
	4.10.3	IFN- α inhibits HEV subgenomic RNA replication in Huh7.5 cells	93
	4.10.4	Intracellular gene expression associated with IFN- α antiviral activity	93-94
	4.10.5	Impaired HEV replication in Huh7.5 cells expressing functional RIG-I	94-95
	4.10.6	RIG-I complementation restores the host antiviral response in Huh7.5 cells	95-96
	4.10.7	Inhibition of pattern recognition receptor signalling enhances HEV replication efficiency in hepatoma cells	96-97
	4.10.8	BX795 treatment has a time dependent effect on HEV RNA replication	97

	4.10.9	BX795 suppresses activation of IRF3 and expression of ISGs	98
	4.10.10	Effect of anti-IFN antibodies on HEV replication	99-100
Chapter 5: Discussion			102
Chapter 6: Conclusions			111
Chapter 7: Bibliography			112-149
Publications
