ACKNOWLEDGEMENTS

The present work has been carried out in the Department of Geology, Bangalore University, Bangalore under the supervision and guidance of Dr. A.M. Pathan, Professor of Geology, Bangalore University, Bangalore. I am deeply indebted to him for suggesting the research problem, the keen interest, the constant encouragement and his pains taking continued guidance. The quality of the work has greatly improved by the stimulating discussions, which I have had with him.

I am highly grateful and thankful to Dr. C. Naganna, D.Sc. (Prague), Professor and Chairman, Departmental Council, Department of Geology, Bangalore University, Bangalore for his keen interest and constant encouragement and all facilities, which he extended to me throughout this work, without which the work would not have been completed. He has also been kind enough to spare his precious time to go through the script of the thesis and to give useful suggestions.

I am thankful to University Grants Commission, New Delhi for awarding a Teacher-fellowship under F.I.P. scheme. I express my sincere gratitudes to the Vice-Chancellor, the Registrar and the Director (CDC) of Mysore University and the Principal of Yuvaraja's College, Mysore, who were kind enough to depute me as Teacher-fellow to Bangalore University to complete this work.
I am highly thankful to the Deputy Director General and the Directors of PPOD and Chemical labs. of ANSE Wing, Geological Survey of India, Bangalore for permitting me to get the chemical data of rocks and ores of the area.

My sincere thanks are due to Dr. B. Mahabaleswar, Professor of Geology, Dr. G. Srinivas, Reader in Geology, Dr. K. S. Anantha Murthy, Sri T. J. Renuka Prasad and Dr. N. Shadakshara Swamy, Lecturers, Department of Geology, Bangalore University, Bangalore for their help and fruitful suggestions.

My thanks are due to Sri R. N. Udupi, Department of Geology, Bangalore University, for his help in the microscopic examination of rocks; to Sri Syed Riyazulla, Indian Bureau of Mines, Bangalore for his help in taking photomicrographs; to Sri Sreenivas Murthy, Indian Institute of Science for his cartographic assistance; and to Sri K. N. Bhadreshaiah for the excellent final typing of the thesis. Also I wish to thank all the staff members of Faculty of Geology, Bangalore University, Bangalore and my friends for their affectionate encouragement, suggestions and help.
