Bibliography

tuberculosis is independent of mature mycobacterial lipoproteins but dependent on TLR2. J. Immunol. 176, 3019-3027.

Khader,S.A., Pearl,J.E., Sakamoto,K., Gilmartin,L., Bell,G.K., Jelley-Gibbs,D.M., Ghilardi,N., deSauvage,F., and Cooper,A.M. (2005). IL-23 compensates for the absence of IL-12p70 and is essential for the IL-17 response during tuberculosis but is dispensable for protection and antigen-specific IFN-gamma responses if IL-12p70 is available. J. Immunol. 175, 788-795.

Mayer-Barber,K.D. (2011). Innate and adaptive interferons suppress IL-1+Î· and IL-1+Î· production by distinct pulmonary myeloid subsets during Mycobacterium tuberculosis infection. Immunity 35, 1023-1034.
