It is a great pleasure to thank one and all whose blessings showered over me to completion of this thesis. It is my privilege to be amidst some intellectual genius who guided in my pursuit of knowledge and hence I owe my deepest and sincerest gratitude to all of them.

First and foremost, I would like to thank my supervisor Dr. Prodeep Phukan, for his valuable guidance, continuous moral support and endless words of encouragement. He showed me different ways to approach a research problem and need to be persistent to accomplish any goal. He is one of the rare advisors that a Research Scholar dreams that they will find. Without his support, it could not have done what it was able to do. I express my sincere thanks to HoD of the Chemistry Department, Gauhati University for providing me the lab facilities during my research work. I would also like to thank my Doctoral committee and all other faculty members of the Department for their fruitful discussions and valuable suggestions to come up to this stage.

I extend my sincere thanks and appreciation to Dr. Kula Kamal Senapatī, along with other colleagues of CIF, IIT Guwahati for their helping hands in providing analytical data during the entire period. Moreover, I must mention my colleagues and some of the research scholars of Chemical Engineering Department, IIT Guwahati for their assistance, moral support, encouragement and extending their all around helping hands in various ways throughout my research period.
I am very much thankful to all my lab mates for their all time readiness of helping hand and golden company. I would like to thank Arun, Biswa, Pabitra, Subhasish, Indrani, Kamal, Sanjay Singh, Manas, Mridusmita, Bhupen Baruah, Pragyashree, Debojit, Dolly, Rajsekhar, Mridul Hazarika, Balin Bhuyan, Chintamoni Sarma and proud to be a member of the group by seeing their dedication and enthusiastic work spirit that encouraged me during my experimental work.

Last, but not least, I am highly indebted and grateful to parents and in laws along with all other family members for their endless love, inspiration, unconditional support and encouragement to pursue my interests. I would like to express my deepest sense of gratitude to my wife Minakshi and my son Jimpu for their unconditional love, affection, utmost care, immense sacrifice, unlimited patience and constant encouragement. I appreciate their understanding and their moral support which relaxed me whenever I was in trouble and that kept me focused and motivated, throughout this work. This thesis would not have been possible to complete without their constant endorsement. Of course, despite all the assistance provided by others, I alone remain responsible for my unwilling omissions and apologize for it.
