LIST OF FIGURES

Chapter 1

Figure 1.1  Nanotech Size Comparisons  . . . . . .  2
Figure 1.2  Nanotech Promoters in India  . . . . . .  4
Figure 1.3  Hexagonal wurtzite crystal structure of ZnO  9

Chapter 2

Figure 2.1  Sol - Gel Process  . . . . . . . . . . . . . . .  22
Figure 2.2  ZnO Nanostructures (ZnO-Ns) synthesized through Sol - Gel route  . . . . . . . . . . . . . . .  23
Figure 2.3  ZnO Nanostructures (ZnO-Ns) synthesized through Hydrothermal route  . . . . . . . . . . . . .  25
Figure 2.4  ZnO Nanostructures (ZnO-Ns) synthesized through Microwave Technique  . . . . . . . . . . .  27
Figure 2.5  Applications of Sonochemistry in Material Sciences  . . . . . . . . . . . . . . . . . . . . . . . . . .  29
Figure 2.6  ZnO Nanostructures (ZnO-Ns) synthesized through Sonochemical route  . . . . . . . . . . .  30
Figure 2.7  ZnO Nanostructures (ZnO-Ns) synthesized through Different routes  . . . . . . . . . . . . . . .  32
Figure 2.8 FE-SEM, PL and Optical Transmittance of ZnO films with thicknesses: (a) 14.2 nm, (b) 20.7 nm, (c) 42.7 nm, (d) 51.4 nm and (e) 62.7nm.

Figure 2.9 Procedural efforts performed by H. D. Espinosa et al. for characterization of mechanical properties of ZnO Nanowires.

Figure 2.10 Developed dipole moment in ZnO tetrahedron (responsible for Piezoelectric effect).

Figure 2.11 (a) Schematic diagram of Piezoelectric nano-device with ZnO nanorods; Output parameter generated by piezoelectric nanogenerators with ZnO nanorods: (b) Current density of piezoelectric nano-device; (c) V∝ of piezoelectric nano-device.

Figure 2.12 I-V values of ZnO films with thicknesses: (a) 14.2 nm, (b) 20.7 nm, (c) 42.7 nm, (d) 51.4 nm, and (e) 62.7nm.

Figure 2.13 Electrical properties (dotted lines) of AZO/u-ZnO developed by K. Maejima et al. The horizontal axis shows the deposition temperature (°C) of AZO/u-ZnO buffer layer.

Figure 2.19 FT-IR ........................................................................ 51
Figure 2.20 TG-DTA & DSC .............................................................. 51
Figure 2.21 Photocatalytic Degradation from ZnO Nanostructures ............................................................ 54
Figure 2.22 Experimental setup diagram of Photocatalytic Degradation ............................................................ 55
Figure 2.23 Anti-Microbial Application of ZnO Nanostructures ............................................................ 58
Figure 2.24 Application of ZnO Nanostructures for detection of biological molecules ........................................... 60

Chapter 3

Figure 3.1 Flow-diagram for the synthesis of Peanut-shaped ZnO-NBs ............................................................ 111
Figure 3.2 XRD of Peanut-shaped ZnO-NBs prepared at different temperature ranges; TEMP-I (40±3°C) and TEMP-II (60±3°C) ............................................................ 114
Figure 3.3 UV-vis spectra of Peanut-shaped ZnO-NBs prepared at different temperature ranges; TEMP-I and TEMP-II ............................................................ 115
Figure 3.4 SEM photographs of Peanut-shaped ZnO-NBs prepared at different temperature ranges; TEMP-I and TEMP-II ............................................................ 117
Figure 3.5  SEM photographs of Peanut shaped ZnO 1D Single crystal prepared at different temperature ranges; TEMP-I and TEMP-II 118

Figure 3.6  TEM images along with SAED patterns (inset) of Peanut shaped ZnO 1D Single crystal prepared at different temperature ranges; TEMP-I and TEMP-II 119

Figure 3.7  EDAX of Peanut-shaped ZnO-NBs prepared at different temperature ranges; TEMP-I and TEMP-II 120

Figure 3.8  Comparative chart of Length (L) of Peanut-shaped 1D-ZnO single crystal prepared at different temperature ranges; TEMP-I and TEMP-II 121

Figure 3.9  Comparative chart of Diameter (D) of Peanut-shaped 1D-ZnO single crystal prepared at different temperature ranges; TEMP-I and TEMP-II 122

Figure 3.10  Schematic representation of the growth order of the Peanut shaped one-dimensional (1D) single crystal ZnO (in the presence of C_{19}H_{42}NBr) . . . 123

Figure 3.11  Comparative chart of Aspect Ratio (L/D) of Peanut-shaped 1D-ZnO single crystal prepared at different temperature ranges; TEMP-I and TEMP-II 123

Chapter 4

Figure 4.1  Flow-diagram for the synthesis of ZnO Nano-whiskers (ZNWs) . . . . . . . . . . . . . . . . . 135
Figure 4.2 XRD of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II. . . . . . . . . . . . . 137
Figure 4.3 EDS of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II. . . . . . . . . . . 138
Figure 4.4 Enlarged SEM photographs of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . 139
Figure 4.5 TEM images of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . 140
Figure 4.6 UV-vis of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . . . 141
Figure 4.7 DSC-TGA of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . 142
Figure 4.8 FT-IR of Zinc oxide nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . . . 143
Figure 4.9 PL of Zinc oxide Nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . . . 144
Figure 4.10 TG-DTA of Zinc oxide nano-whiskers (ZNWs) at STIR-I & STIR-II . . . . . . . . 145
Figure 4.11 SEM photographs of Zinc oxide Nano-whiskers (ZNWs) Colonies at STIR-I & STIR-II . . . . 147

Chapter 5

Figure 5.1 Antimicrobial activities of ZnO-NBs prepared at different temperature ranges against Gram-positive (Bacillus subtilis) . . . . . . . . . . . . . . . . . . . . . . . . . 171
Figure 5.2  Change in absorbance on irradiation of an aqueous suspension of acid red 183 in the presence of ZnO Nano-whiskers (ZNWs) . . . . . . 175

Figure 5.3  Change in concentration as a function of time on irradiation of an aqueous solution of acid red 183 in the presence and absence of ZnO Nano-whiskers (ZNWs) . . . . . . . . 176

Figure 5.4  Comparison of decolourization rate of acid red 183 in the presence of different types of photo-catalysts 178

Appendix - III

Figure (AI.1) Letter regarding Experience in Instrumentation Techniques (IIT-Roorkee) during the study 204
