ACKNOWLEDGEMENTS

It is with a great sense of pleasure, pride and achievement that I would like to express and place on record my heartfelt gratitude and appreciation to Prof. S. R. Ambilika, Department of Botany, Bangalore University for her encouragement, inspiration and guidance at every stage. I am indebted to her for the selection of such a topical and interesting subject, which made the study a very wonderful learning experience.

I would like to sincerely thank Prof. D. H. Tejavathi, Chairperson, Department of Botany, Bangalore University for her encouragement and support in extending all help and facilities needed to complete this work.

Prof. M.C.Gayatri and Prof. D.Anusuya, Department of Botany, Bangalore University for their support and encouragement and for their valued suggestions and advice.

My sincere thanks and appreciation to Prof. Rajalakshmi, Department of Statistics, Bangalore University, Bangalore for advising me patiently on the statistical analysis of my data.

To colleagues in the department Smitha, Anandraju, Prathiba and Poomima for all their help in putting this project together. I would specially like to thank Smitha for her time spent on helping me with the graphs.

My heartfelt thanks and appreciation to Sr.Philomena Cardoza, Principal, Jyoti Nivas College, who gave me permission and encouragement to register and pursue my doctoral studies, and also for granting me leave and other support from the college.
My sincere thanks to Sr. Elizabeth, Vice-Principal, Jyoti Nivas College for her unstinting support and encouragement.

I am also gratefully thankful to Sr. Louisa, Principal, Jyoti Nivas Pre-University College for her encouraging care and concern during the time of putting this work together.

To Minu, Jayanthi, Leena, Silavi and Geetha my colleagues at Jyoti Nivas College, gratitude and appreciation for their support, being there when I needed them, offering at every stage their help.

I thank Dr. R. Parvathi, Holy Cross College, Trichy for her valuable advice and support.

To the Librarians and staff at the Indian Institute of Science and the University of Agricultural Sciences, my thanks for allowing me to use their facilities when ever required.

My thanks to the staff of the Horticultural Institute, Hulimavu, Bangalore for helping me with carrying out the HPLC analysis.

My sincere thanks to staff of the Botany department, Bangalore University for all the assistance and help rendered during this project.

Gratitude to Sr. Roserita of Jyoti Nivas College for making available facilities in the college garden to carry out my field study.
My thanks and appreciation to Sr. Euphrasia, Manager, Jyoti Nivas College for her encouragement, prayers and support.

Grateful thanks and appreciation to Govind, Nagaraj, Raju and Thangaraj, field assistants who have labored hard and sincerely for my field study without which this study would not have been possible.

Last but not the least my sincere thanks, gratitude and appreciation to my family who stood by me offering support and encouragement. Especially to my late departed mother who has been a tower of strength, encouraging at all times to reach my goals.

To many more who have been a part of this project both directly and indirectly, whose names have not been mentioned here my heartfelt thanks and gratitude.
