3.2.7 Study of the mechanism of self-pollination

3.2.8 Joint segregation of different traits

3.2.9 Inheritance of economically important traits

3.2.10 Raising of parental, F₁, F₂, F₃ and backcross generations for inheritance studies

3.2.11 Determination of magnitude of heterosis

3.2.12 Evaluation of potential utility of some mutants

3.3 Statistical Analysis

4. RESULTS

4.1 Floral biology

4.1.1 Time of anthesis

4.1.2 Anther dehiscence

4.1.3 Stigma receptivity

4.1.4 Pollen viability

4.2 Estimation of extent of intra-flower self-pollination

4.2.1 Experiment 1

4.2.2 Experiment 2

4.3 Artificial selfing and hybridization techniques

4.3.1 Artificial selfing technique

4.3.2 Hybridization technique

4.4 Characterization of Mutants and inheritance of mutant morphological traits

4.4.1 Mutant No: EMS 7-5

4.4.2 Mutant No: NEU 1-7

4.4.3 Mutant No: NEU 6-15

4.4.4 Mutant No: NEU 24-17

4.4.5 Mutant No: NEU 24-5

4.4.6 Mutant No: EMS 18-12

4.4.7 Mutant No: NEU 6-7

4.4.8 Mutant No: EMS 19-14
4.4.9 Inheritance of purple pigmentation on cotyledonary leaves

4.5 Inheritance of floral traits

4.5.1 Mutant No: NEU 6-15-1
4.5.2 Mutant No: NEU 24-17-1
4.5.3 Mutant No: NEU 1-7-1
4.5.4 Inheritance of corolla colour and eye colour

4.6 Inheritance of reproductive traits

4.6.1 Mutant No: EMS 1-10
4.6.2 Mutant No: EMS 2-22
4.6.3 Study of the mechanism of self-pollination
4.6.4 Inheritance of mechanism of intra-flower self-pollination

4.7 Joint segregation of different traits

4.7.1 Joint segregation of curved leaves trait (EMS 7-5) with wavy leaf margin trait (NEU 1-7)
4.7.2 Joint segregation of curved leaves trait (EMS 7-5) with extreme tall trait (EMS 18-12)
4.7.3 Joint segregation of curved leaves trait (EMS 7-5) with dwarf habit (NEU 6-15)
4.7.4 Joint segregation of curved leaves trait (EMS 7-5) with semi-dwarf habit (NEU 24-17)
4.7.5 Joint segregation of curved leaves trait (EMS 7-5) with round leaves trait (NEU 24-5)
4.7.6 Joint segregation of wavy leaf margin (NEU 1-7) with extreme tall trait (EMS 18-12)
4.7.7 Joint segregation of wavy leaf margin (NEU 1-7) with dwarf habit (NEU 6-15)
4.7.8 Joint segregation of wavy leaf margin (NEU 1-7) with semi-dwarf trait (NEU 24-17)
4.7.9 Joint segregation of wavy leaf margin (NEU 1-7) with round leaves (NEU 24-5)
4.7.10 Joint segregation of dwarf habit (NEU 6-15) with extreme tall (EMS 18-12)
4.7.11 Joint segregation of semi-dwarf habit (NEU 24-17) with extreme tall (EMS 18-12)

4.7.12 Joint segregation of round leaves (NEU 24-5) with extreme tall (EMS 18-12)

4.7.13 Joint segregation of dwarf habit (NEU 6-15) with semi-dwarf habit (NEU 24-17)

4.7.14 Joint segregation of dwarf habit (NEU 6-15) with round leaves (NEU 24-5)

4.7.15 Joint segregation of semi-dwarf habit (NEU 24-17) with round leaves (NEU 24-5)

4.7.16 Joint segregation of curved leaves (EMS 7-5) with purple stem (PS-1)

4.7.17 Joint segregation of wavy leaf margin (NEU 1-7) with purple stem (PS-1)

4.7.18 Joint segregation of extreme tall trait (EMS 18-12) with purple stem (PS-1)

4.7.19 Joint segregation of dwarf habit with purple stem

4.7.20 Joint segregation of semi-dwarf habit (NEU 24-17) with purple stem (PS-1)

4.7.21 Joint segregation of round leaves (NEU 24-5) with purple stem (PS-1)

4.7.22 Joint segregation of small flower trait with semi-dwarf trait of the mutant (NEU 24-17-1)

4.7.23 Joint segregation of narrow petal trait with the wavy leaf margin trait of the mutant (NEU 1-7-1)

4.7.24 Joint segregation of indehiscent anthers and wavy leaf margin traits of the mutant EMS 1-10

4.7.25 Joint segregation of wavy leaf margin trait with pollen sterility of the mutant EMS 2-22

4.7.26 Joint segregation of intra-flower self-pollination with stem pigmentation

4.7.27 Joint segregation of wavy leaf margin with intra-flower self-pollination
4.7 28 Joint segregation of intra-flower self-pollination with plant height

4.8 Inheritance of economically important traits

4.8.1 Inheritance of content of alkaloids in leaves
4.8.2 Inheritance of content of alkaloids in roots

4.9 Evaluation of magnitude of heterosis

4.9.1 Leaf yield
4.9.2 Root yield
4.9.3 Content of alkaloids in leaves
4.9.4 Content of alkaloids in roots

4.10 Evaluation of potential utility of some useful mutants

4.10.1 Leaf yield
4.10.2 Root yield
4.10.3 Content of alkaloids in leaves
4.10.4 Content of root alkaloids

5. DISCUSSION

6. SUMMARY
