</table>
Table No. 4.6: The percentage nitric oxide inhibition of *D. regia* petals extract.

Table No. 4.7: The percentage nitric oxide inhibition of *D. regia* leaves extract.

Table No. 4.8: The percentage nitric oxide inhibition of butylated hydroxytoluene.

Table No. 4.9: The percentage hydrogen peroxide inhibition of *D. regia* petals extract.

Table No. 4.10: The percentage hydrogen peroxide inhibition of *D. regia* leaves extract.

Table No. 4.11: The percentage hydrogen peroxide inhibition of butylated hydroxytoluene.

Table No. 4.12: The percentage DPPH inhibition of *D. regia* petals extract.

Table No. 4.13: The percentage DPPH inhibition of *D. regia* leaves extract.

Table No. 4.14: The percentage DPPH inhibition of butylated hydroxytoluene.

Table No. 4.15: The percentage inhibition values by total anti-oxidant capacity method of *D. regia* petals extract.

Table No. 4.16: The percentage inhibition value by total anti-oxidant capacity method of *D. regia* leaves extract.

Table No. 4.17: The percentage inhibition values by total anti-oxidant capacity method of butylated hydroxytoluene.

Table No. 4.18: The IC$_{50}$ value of different anti-oxidant activity of methanolic petals and leaves extract of *D. regia* and butylated hydroxytoluene (BHT).

Table No. 5.1: The percentage yield of methanolic seed extracts of *Lallemantia royleana*.

Table No 5.2: Phyto-chemical analysis of seeds extract of *L. royleana*.
Table No. 5.3: The percentage alkaline DMSO inhibition of *L. royleana* seeds extract.  
Table No. 5.4: The percentage alkaline DMSO inhibition of butylated hydroxytoluene.  
Table No. 5.5: The percentage nitric oxide inhibition of *L. royleana* seeds extract.  
Table No. 5.6: The percentage nitric oxide inhibition of butylated hydroxytoluene.  
Table No. 5.7: The percentage hydrogen peroxide inhibition of *L. royleana* seeds extract.  
Table No. 5.8: The percentage hydrogen peroxide inhibition of butylated hydroxytoluene.  
Table No. 5.9: The percentage DPPH inhibition of *L. royleana* seeds extract.  
Table No. 5.10: The percentage DPPH inhibition of butylated hydroxytoluene.  
Table No. 5.11: The percentage total anti-oxidant capacity of *L. royleana* seeds extract.  
Table No. 5.12: The percentage inhibition by total anti-oxidant capacity of butylated hydroxytoluene.  
Table No. 5.13: The IC$_{50}$ value of different anti-oxidant activity of methanolic seeds extract of *L. royleana*.  
Table No. 5.14: The table shows peak results of *L. royleana* methanolic seed extract.  
Table No. 6.1: The percentage yield of methanolic seed extracts of *Phyllanthus maderaspatensis*.  
Table No. 6.2: Phyto-chemical analysis of seeds extract of *P. maderaspatensis*.  
Table No. 6.3: The percentage alkaline DMSO inhibition of *P. maderaspatensis* seeds extract.
Table No. 6.4: The percentage alkaline DMSO inhibition of butylated hydroxytoluene.

Table No. 6.5: The percentage nitric oxide inhibition of *P. maderaspatensis* seeds extract.

Table No. 6.6: The percentage nitric oxide inhibition of butylated hydroxytoluene.

Table No. 6.7: The percentage hydrogen peroxide inhibition of *P. maderaspatensis* seeds extract.

Table No. 6.8: The percentage hydrogen peroxide inhibition of butylated hydroxytoluene.

Table No. 6.9: The percentage DPPH inhibition of *P. maderaspatensis* seeds extract.

Table No. 6.10: The percentage DPPH inhibition of butylated hydroxytoluene.

Table No. 6.11: The percentage inhibition by total anti-oxidant capacity of *P. maderaspatensis* seeds extract.

Table No. 6.12: The percentage inhibition by total anti-oxidant capacity of butylated hydroxytoluene.

Table No. 6.13: The IC50 value of different anti-oxidant activity of methanolic seeds extract of *P. maderaspatensis* and standard(BHT).

Table No. 6.14: The table shows the peak results of *P. maderaspatensis* methanolic seed extract

Table No. 7.1: The percentage yield of methanolic seed extracts of *Plantago ovata*

Table No. 7.2: Phyto-chemical analysis of seeds extract of *P. ovata*.

Table No. 7.3: The percentage alkaline DMSO inhibition of *P. ovata* seeds extract.

Table No. 7.4: The percentage alkaline DMSO inhibition of butylated hydroxytoluene.

</table>
Table No. 8.6: The percentage nitric oxide inhibition of butylated hydroxytoluene.

Table No. 8.7: The percentage hydrogen peroxide inhibition of \textit{R. indica} petals extract.

Table No. 8.8: The percentage hydrogen peroxide inhibition of butylated hydroxytoluene.

Table No. 8.9: The percentage DPPH inhibition of \textit{R. indica} petals extract.

Table No. 8.10: The percentage DPPH inhibition of butylated hydroxytoluene.

Table No. 8.11: The percentage total anti-oxidant capacity of \textit{R. indica} petals extract.

Table No. 8.12: The percentage inhibition by total anti-oxidant capacity of butylated hydroxytoluene.

Table No. 8.13: The IC\textsubscript{50} value of different anti-oxidant activity of methanolic petals extract of \textit{R. indica} and standard (BHT).

Table No. 8.14: The table shows the peak results of \textit{R. indica} methanolic petals extract.

Table No. 9.1: Percentage yield of methanolic plant extracts.

Table No. 9.2: Results of Phyto-chemical analysis of \textit{Solanum nigrum}

Table No. 9.3: The percentage alkaline DMSO inhibition of methanolic berries extract of \textit{S.nigrum}.

Table No. 9.4: The percentage alkaline DMSO inhibition of methanolic leaves extract of \textit{S.nigrum}.

Table No. 9.5: The percentage alkaline DMSO inhibition of methanolic flowers extract of \textit{S.nigrum}.

Table No. 9.6: The percentage alkaline DMSO inhibition of butylated hydroxytoluene.

Table No. 9.7: The percentage nitric oxide radical inhibition of
methanolic berries extract of *S.nigrum*.

Table No. 9.8: The percentage nitric oxide radical inhibition of methanolic leaves extract of *S.nigrum.* 251

Table No. 9.9: The percentage nitric oxide radical inhibition of methanolic flowers extract of *S.nigrum.* 252

Table No. 9.10: The percentage nitric oxide radical inhibition of butylated hydroxytoluene. 252

Table No. 9.11: The percentage hydrogen peroxide radical inhibition of methanolic berries extract of *S.nigrum.* 253

Table No. 9.12: The percentage hydrogen peroxide radical inhibition of methanolic leaves extract of *S.nigrum.* 253

Table No. 9.13: The percentage hydrogen peroxide radical inhibition of methanolic flowers extract of *S.nigrum* 254

Table No. 9.14: The percentage hydrogen peroxide radical inhibition of butylated hydroxytoluene. 254

Table No. 9.15: The percentage DPPH radical inhibition of methanolic berries extract of *S.nigrum.* 255

Table No. 9.16: The percentage DPPH radical inhibition of methanolic leaves extract of *S.nigrum.* 255

Table No. 9.17: The percentage DPPH radical inhibition of methanolic flowers extract of *S.nigrum.* 256

Table No. 9.18: The percentage DPPH radical inhibition of butylated hydroxytoluene. 256

Table No. 9.19: The percentage inhibition by total anti-oxidant capacity of methanollic berries extract of *S. nigrum.* 257

Table No. 9.20: The percentage inhibition by total anti-oxidant capacity of methanollic leaves extract of *S. nigrum.* 257

Table No. 9.21: The percentage inhibition by total anti-oxidant capacity of methanollic flowers extract of *S. nigrum.* 258

Table No. 9.22: The percentage inhibition by total anti-oxidant capacity of butylated hydroxytoluene. 258
Table No. 9.23: The IC$_{50}$ value of different anti-oxidant activity of methanolic berries, leaves and flowers extract of S. nigrum and butylated hydroxytoluene (BHT).

Table No. 9.24: The table shows peak results of S. nigrum methanolic berries extract.

Table No. 11.1: Comparative study of Percentage yield of all the plant extracts.

Table No. 11.2: Comparative study of total phenolics and total tannins content of all the plant extracts.

Table No. 11.3: Comparative study of Phyto-chemical analysis of all plant extracts.

Table no. 11.4: Comparative chart for IC$_{50}$ value for all the plants extracts.

Table No. 11.5: Comparative study of R$_f$ value of all plant extracts.
