(G.A.), *D. regia* Flower (D.R. (L)) and *D. regia* (D.R. (P))

**Figure No. 5.1:** *Lallementia royleana*  
124

**Figure No. 5.2:** Calibration curve for gallic acid for determining the phenolic content.  
128

**Figure No. 5.3:** Calibration curve for tannic acid for determining the tannin content.  
128

**Figure No. 5.4:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Lallementia royleana* (LR) and butylated hydroxy toluene (BHT) as standard by using Alkaline DMSO method.  
139

**Figure No. 5.5:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Lallementia royleana* (LR) and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity.  
140

**Figure No. 5.6:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Lallementia royleana* (LR) and Butylated hydroxy toluene (BHT) as standard by using hydrogen peroxide scavenging method.  
140

**Figure No. 5.7:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Lallementia royleana* (LR) and Butylated hydroxy toluene (BHT) as standard by using DPPH radical scavenging activity.  
141

**Figure No. 5.8:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Lallementia royleana* (LR) and Butylated hydroxy toluene (BHT) as standard by using total anti-oxidant capacity.  
141

**Figure No. 5.9:** Thin layer chromatography plate showing resolution of methanolic crude extracts. Tannic acid (T.A.), Gallic acid (G.A.), *Lallementia royleana* (L.R.)  
144

**Figure No. 5.10:** Chromatogram of *Lallementia royleana* methanolic extract  
144

**Figure No. 6.1:** *Phyllanthus maderaspatens*  
150

**Figure No. 6.2:** Calibration curve for gallic acid for determining the phenolic content.  
154
**Figure No. 6.3:** Calibration curve for tannic acid for determining the tannin content.

**Figure No. 6.4:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Phyllanthus maderaspatensis* (PM) and butylated hydroxy toluene (BHT) as standard by using Alkaline DMSO method.

**Figure No. 6.5:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Phyllanthus maderaspatensis* (PM) and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity.

**Figure No. 6.6:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Phyllanthus maderaspatensis* (PM) and Butylated hydroxy toluene (BHT) as standard by using hydrogen peroxide scavenging method.

**Figure No. 6.7:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Phyllanthus maderaspatensis* (PM) and Butylated hydroxy toluene (BHT) as standard by using DPPH radical scavenging activity.

**Figure No. 6.8:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Phyllanthus maderaspatensis* (PM) and Butylated hydroxy toluene (BHT) as standard by using total anti-oxidant capacity.

**Figure No. 6.9:** Thin layer chromatography plate showing resolution of methanolic crude extracts. Tannic acid (T.A.), Gallic acid (G.A.), *Phyllanthus maderaspatensis* (P.M.).

**Figure No. 6.10:** Chromatogram of *Phyllanthus maderaspatensis* methanolic extract.

**Figure No. 7.1:** *Plantago ovata*

**Figure No. 7.2:** Calibration curve for gallic acid for determining the phenolic content.

**Figure No. 7.3:** Calibration curve for tannic acid for determining the tannin content.

**Figure No. 7.4:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Plantago ovata* (PO) and butylated
hydroxy toluene (BHT) as standard by using Alkaline DMSO method.

**Figure No. 7.5:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Plantago ovata* (PO) and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity.

**Figure No. 7.6:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Plantago ovata* (PO) and Butylated hydroxy toluene (BHT) as standard by using hydrogen peroxide scavenging method.

**Figure No. 7.7:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Plantago ovata* (PO) and Butylated hydroxy toluene (BHT) as standard by using DPPH radical scavenging activity.

**Figure No. 7.8:** Graphical representation of percent inhibition of methanolic extract of the seeds of *Plantago ovata* (PO) and Butylated hydroxy toluene (BHT) as standard by using total antioxidant capacity.

**Figure No. 7.9:** Thin layer chromatography plate showing resolution of methanolic crude extracts. Tannic acid (T.A.), Gallic acid (G.A.), *Plantago ovata* (P.O.).

**Figure No. 7.10:** Chromatogram of *Plantago ovata* methanolic extract

**Figure No. 8.1:** *Rosa indica*

**Figure No. 8.2:** Calibration curve for gallic acid for determining the phenolic content.

**Figure No. 8.3:** Calibration curve for tannic acid for determining the tannin content.

**Figure No. 8.4:** Graphical representation of percent inhibition of methanolic extract of petals of *Rosa indica* and Butylated hydroxy toluene (BHT) as a standard by using Alkaline DMSO method.

**Figure No. 8.5:** Graphical representation of percent inhibition of methanolic extract of petals of *Rosa indica* and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity.
Figure No. 8.6: Graphical representation of percent inhibition of methanolic extract of petals of *Rosa indica* and Butylated hydroxy toluene (BHT) as standard by using hydrogen peroxide scavenging method. 224

Figure No. 8.7: Graphical representation of percent inhibition of methanolic extract of petals of *Rosa indica* and Butylated hydroxy toluene (BHT) as standard by using DPPH radical scavenging activity. 225

Figure No. 8.8: Graphical representation of percent inhibition of methanolic extract of petals of *Rosa indica* and Butylated hydroxy toluene (BHT) as standard by using total anti-oxidant capacity. 225

Figure No. 8.9: Thin layer chromatography plate showing resolution of methanolic crude extracts. Tannic acid (T.A.), Gallic acid (G.A.), *Rosa indica* (R.I.). 228

Figure No. 8.10: Chromatogram of *Rosa indica* methanolic extract. 228

Figure No. 9.1: *Solanum nigrum* 235

Figure No. 9.2: Calibration curve for gallic acid for determining the phenolic content. 241

Figure No. 9.3: Calibration curve for tannic acid for determining the tannin content. 241

Figure No. 9.4: Graphical representation of percent inhibition of methanolic extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* and butylated hydroxy toluene (BHT) as standard by using Alkaline DMSO method. 259

Figure No. 9.5: Graphical representation of percent inhibition of methanolic extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity. 259

Figure No. 9.6: Graphical representation of percent inhibition of methanolic extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* and Butylated hydroxy toluene (BHT) as standard by using hydrogen peroxide scavenging method. 260

Figure No. 9.7: Graphical representation of percent inhibition of methanolic extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* and Butylated hydroxy toluene (BHT) as standard by using nitric oxide radical scavenging activity. 260
extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* Butylated hydroxy toluene (BHT) as standard by using DPPH radical scavenging activity.

**Figure No. 9.8:** Graphical representation of percent inhibition of methanolic extract of berries (SNB), leaves (SNL) and flowers (SNF) of *Solanum nigrum* Butylated hydroxy toluene (BHT) as standard by using total anti-oxidant capacity.

**Figure No. 9.9:** Thin layer chromatography plate showing resolution of methanolic crude extracts. Tannic acid (T.A.), Gallic acid (G.A.), *Solanum nigrum* (S.N.).

**Figure No. 9.10:** Chromatogram of *Solanum nigrum* methanolic extract.
