ACKNOWLEDGEMENT

Words can hardly express my deep sense of gratitude, indebtedness and reverence for my esteemed teacher and research guide Professor R. V. Upadhyay, Principal, (PDPIAS), (CHARUSAT), Changa, for his fatherly care, guidance and constant encouragement throughout the study. I am extremely thankful for his endless kind cooperation and lively interest. Under his closely monitored and positively contributing guidance, I could learn about various attributes required for scientific thinking, methodology and perception. Without his meticulous attention of detail and inspirational instructions this research work would not have been in the present form.

I have been fortunate in getting the kind cooperation and valuable help from Dr. V. Siruguri, Center Director, UGC-DAE Consortium for Scientific Research, Mumbai Centre, Bhabha Atomic Research Centre (BARC), without his inspiring supports it would have been difficult for me to achieve my goal. I feel ecstatically delighted in expressing my sincere thanks Dr. S Rayaprol, Dr. Som Datta Kaushik, UGC-DAE CSR, Mumbai Centre, BARC, for their scientific advices and assistance in data refinement. I also thank to Dr. A Banerjee, UGC-DAE-CSR, Indore, for letting me use the magnetization measurements facilities.

It is indeed my great pleasure to work in UGC-DAE-CSR Project M-141 (Mumbai center). I am acknowledging the funding agency for my research fellowship.

I owe a deep sense of gratitude to Dr Kinnari Parekh and Dr. Rucha Desai for their judicious, benevolent guidance, valuable help, and suggestions during the entire study and especially during preparation of thesis.

I express my sincere gratitude to Prof. T. K. Chaudhuri, Deputy Director of Dr. K. C. Patel R & D Centre, Charotar University of Science and Technology (CHARUSAT), Changa, for their valuable guidance and constant help during the entire period of my study. I am also thankful to Dr Anjana Kothari, Dr C. S. Patel, Dr. Mitesh Patel and Mr. Jayesh Patel for their supports.

I thanks to my colleagues Ms. Kruti Shah and Mr. Devendra Tiwari for their all time support. I will always remember our evening session discussion and guidance provided by Mr. Devendra Tiwari. I extent my feeling to the new research scholars of PDPIAS for encouraging words. I am extremely thankful to Dr. P. G. Acharya and all my seniors for their guidance and supports.

From the first day of mine, in this institute, I am getting constant administrative support from Mr. Rakesh Dave and Ms. Mauna Patel. I sincerely thank both of them and teaching & non-teaching staff members of PDPIAS. Also thanks to Ghanshyambhai, Kamleshbhai, Harishbhai and other staff members for their support.
A formal acknowledgement of my emotions is hardly adequate to express my deep feelings for my father and my mother who always believed in giving strong educational wings to their daughter.

I owe my deepest thanks to my elder brother, elder sisters, sister in law and my sweet niece for their love, affection assistance and useful insights.

I am especially grateful to all my friends for their gentle support & cheerful words during the tenure of this study.

I would like to thank everybody who is important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Last but not least, I thank the God almighty for showering me with his blessing and love, showing me the way and providing me the inspiration throughout my life.
