CONTENTS

Preface……………………………………………………………………1-11

Introduction……………………………………………………………12-33

CHAPTER-1 ………………………………………………………………34-50

Solution of a Birkhoff Interpolation Problem by a Special Spline
Function

1.1 Introduction…………………………………………………………35

1.2 Existence and Uniqueness: Theorem: 1…………………………36

1.3 Error Bounds: Theorem: 2……………………………………….41

1.4 Auxiliary Lemmas …………………………………………………42

CHAPTER-2……………………………………………………………..51-66

Lacunary Interpolation (0, 2; 3) problem& some comparison from
Quartic spline

2.1 Introduction ………………………………………………………52

2.2 Construction ……………………………………………………..53

2.3 The Approximation of the Spline functions: Theorem: 1……60
CHAPTER-3 .................................................................67-84

Lacunary Interpolation (0, 2; 3) problem

3.1 Introduction ..................................................................68
3.2 Existence and Uniqueness: Theorem: 1 ............................70
3.3 Auxiliary Lemmas ...........................................................74
3.4 Error Bounds: Theorem: 2 .............................................81

CHAPTER- 4 .................................................................85-93

Lacunary Interpolation with Splines of sextic

4.1 Introduction ..................................................................86
4.2 Design and Construction ..................................................87
4.3 Existence and Uniqueness: Theorem: 1 ............................88
4.4 Error Bounds .................................................................90

CHAPTER 5 ................................................................. 94-117

Lacunary Interpolation at odd and even nodes

5.1 Introduction ..................................................................95
5.2 Existence and Uniqueness: Theorem: 1 ............................95
5.3 Error Bounds: Theorem: 2 .............................................96
5.4 Preliminaries .................................................................97
5.5 Auxiliary Lemmas ..........................................................107

BIBLIOGRAPHY ..........................................................118-135
