List of Tables

3.1 Adiabatic and vertical values (eV) of the ionization potential and electron affinity for \((\text{Ga}_2\text{O}_3)_n\), \((n = 1 – 10)\) clusters. ............................................. 73

4.1 Total energy (eV), magnetic moment \((\mu_B)\), binding energy (eV/atom), HOMO-LUMO gap (eV), and bond lengths (Å) of the ground state configurations of \(\text{Mn(GaO)}_n\), \((n = 1 – 7)\) clusters. ................................. 89

4.2 The magnetic state, \(\Delta E\) refers to the energy difference between the lowest energy FM or AFM state and the other (AFM or FM, respectively) magnetic configuration, magnetic moment \((\mu_B)\), binding energy (eV/atom), HOMO-LUMO gap (eV), and bond lengths (Å) of the ground state configurations of the \(\text{Mn}_2(\text{GaO})_n\), \((n = 0 – 7)\) clusters. FM and AFM refer to magnetic state of the cluster. ................................................................. 95

4.3 The magnetic state, \(\Delta E\) refers to the energy difference between the lowest energy FM or AFM state and the other (AFM or FM, respectively) magnetic configuration, magnetic moment \((\mu_B)\), coordination number (CN) of Gd atoms with O, BE (eV/atom), minimum bond lengths (Å) of Al-O, Gd-O, and Gd-Gd, and the HOMO-LUMO gap (eV) in the ground state configurations of \(\text{Gd}_2\text{Al}_{2n-2}\text{O}_{3n}\), \((n = 1 – 10)\) clusters. ............................................. 113

4.4 Fragmentation energies \(\Delta_1E\) (\(\text{Al}_2\text{O}_3\)) and \(\Delta_2E\) (\(\text{Gd}_2\text{O}_3\)) in eV of the ground state configurations of the \(\text{Gd}(\text{Al}_{2n-1}\text{O}_{3n})\) and \(\text{Gd}_2(\text{Al}_{2n-2}\text{O}_{3n})\), \((n = 1–10)\) clusters. ......................................................... 120

5.1 Transitions (denoted as occupied state \(\rightarrow\) empty state) that contribute to the first peak in the absorption spectra of \((\text{Ga}_2\text{O}_3)_n\), \((n = 1 – 10)\) clusters. The % column shows the percentage contribution of a particular transition. 134

5.2 First optical absorption gap (eV) using TDDFT (LDA-CA) and average coordination numbers of Ga atom and O atom for \((\text{Ga}_2\text{O}_3)_n\) clusters with \(n = 1 – 10\). ................................................................. 135
