## CONTENTS

[List of Tables] 1-12

List of Tables x

List of Figures xii

List of Publications xvi

1 Introduction 1-12

1.1 Background of the study 1

1.2 Objectives 7

1.3 A Brief Survey on Reliability Models 8

1.4 Organization of the thesis 10

2 Cascade System with Random Attenuation Factor 13-21

2.1 Introduction 13

2.2 Mathematical Formulation 14

2.3 The Distribution of $k$ is Uniform 15

2.3.1 Exponential Stress-Strength 15

2.3.2 Weibull Stress-Strength 17

2.3.3 Exponential Strength and Gamma Stress 18

2.4 Graphical Representations 18

2.5 Results and Discussions 21

3 Mixture of Distributions in Cascade System 22-44

3.1 Introduction 22
3.2 Mixture of Distributions: An \( n \)-Cascade System

3.3 Stress- Strength follows Mixture of Distributions
   3.3.1 Mixture of two Exponentials: Cascade System
   (a) Particular case of mixture of two Exponentials: Cascade System
   3.3.2 Mixture of two Rayleighs: Cascade System
   (a) Particular case of mixture of two Rayleighs: Cascade System
   3.3.3 Mixture of two Weibulls: Cascade System
   (a) Particular case of mixture of two Weibulls: Cascade System

3.4 Graphical Representations

3.5 Results and Discussions

4 Cascade Reliability in Different Types of Failure Models
   4.1 Introduction
   4.2 Development of the Mathematical Models
   4.3 Stress-Strength follows Specific Distributions
      4.3.1 Exponential Stress-Strength Distribution
      4.3.2 Rayleigh Stress-Strength Distribution
   4.4 Graphical Representations
   4.5 Results and Discussions

5 A Cascade Model with Random Parameters
   5.1 Introduction
   5.2 Notations and Formulation of the Model
   5.3 Random Strength Parameter
      (a) Uniform Prior for \( \lambda \)
      (b) Two-Point prior for \( \lambda \)

viii
## 5.4 Random Stress Parameter

(a) Uniform Prior for $\mu$  
(b) Two-Point prior for $\mu$

## 5.5 Graphical Representations

## 5.6 Results and Discussions

### 6 Cascade System with $P(X<Y<Z)$

#### 6.1 Introduction

#### 6.2 Mathematical Formulation

#### 6.3 Stress-Strength follows Specific Distributions

##### 6.3.1 Exponential Stress-Strength

##### 6.3.2 Rayleigh Stress-Strength

##### 6.3.3 Lindley Stress-Strength

##### 6.3.4 Both Strengths are One- parameter Exponential and Stress follows Lindley Distributions

##### 6.3.5 Both Strengths are One- parameter Exponential and Stress follows Two-parameter Gamma Distributions

#### 6.4 Graphical Representations

#### 6.5 Results and Discussions

### 7 Conclusion

#### 7.1 Summary of the Thesis

#### 7.2 Future Works

### References

### Appendix
List of Tables

Table 2.1 Values of $R_1, R_2, R_3$ when Stress-Strength follows Exponential Distribution 100
Table 2.2 Values of $R_1, R_2$ when Stress-Strength follows Weibull Distribution 101
Table 2.3 Values of $R_1, R_2$ when Strength follows Exponential and Stress follows Gamma Distribution 102
Table 3.1 Reliabilities $R_1, R_2$ and $R_3$ when Stress and Strength are mixture of Exponential Distribution 103
Table 3.2 Reliabilities $R_1, R_2$ and $R_3$ when Stress and Strength are mixture of Rayleigh Distribution 104
Table 3.3 Reliabilities $R_1, R_2$ and $R_3$ when Stress and Strength are mixture of Weibull Distribution (when shape parameters are equal) 105
Table 3.4 Reliabilities $R_1, R_2$ and $R_3$ when Stress and Strength are mixture of Weibull Distribution (when scale parameters are equal) 106
Table 4.1 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model I where Stress-Strength Distributions are Exponential 107
Table 4.2 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model II where Stress-Strength Distributions are Exponential 108
Table 4.3 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model III where Stress-Strength Distributions are Exponential 109
Table 4.4 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model I where Stress-Strength Distributions are Rayleigh 110
Table 4.5 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model II where Stress-Strength Distributions are Rayleigh 111
Table 4.6 Values of $R(1), R(2), R(3)$ and $R_3$ for Failure model III where Stress-Strength Distributions are Rayleigh 112
Table 5.1 Values of $R_1, R_2$ for Exponential Stress-Strength when Strength parameter $\lambda$ is random and Uniformly distributed in the range $(a,b)$ 113
Table 5.2 Values of $R_1, R_2$ for Exponential Stress-Strength when Strength parameter $\lambda$ is random having Two-Point Distribution 114
Table 5.3 Values of $R_1, R_2$ for Exponential Stress-Strength when Stress parameter $\mu$ is random and Uniformly distributed in the range $(c,d)$ 115
