ACKNOWLEDGMENT

I consider myself extremely fortunate to have had the privilege of working under the inspiring supervision of Dr. Shripad N. Agashe. I have gained knowledge in many ways from his research oriented mind, precision, professional efficiency and his relentless pursuit for excellence. Despite his innumerable commitments, he found time to inspire me at several occasions and it was his enthusiasm and constant encouragement and support which made it possible for me to carry out doctoral research work and submit my Ph.D thesis.

The hope of undertaking this study and successfully completing it would have perhaps remained unfulfilled but for the invaluable help and guidance of the Chairman on the one hand, and my wife, Omima Yassin; ICMR, UGC, New Delhi and friends on the other.

My thanks are due to Dr. P. Anand Immunologist and Otolaryngologist, for his suggestions and guidance in carrying out the clinical aspects of this investigation at his clinic.

I express my deep sense of gratitude and sincere thanks to Dr. R. Uma Shankar, Department of Crop Physiology, GKV, UAS, Dr. Lalith Ajoth, Department of Agriculture Economics, UAS, Hebbal and Dr. Ganshaiah, Department of Plant Breeding GKV, UAS, for their systematic approach, meticulous analysis and suggestions that have cumulatively contributed to the achievement of my goal.

I am grateful to Mr. Mohamed Ayaz Ahmed for his valuable corrections and critical suggestions, without whose assistance this work would not have come out so clean and attractive in type script.

Further I am grateful to Dr. K. Manjunath, Dr. J.N. Abraham, Dr. C. Meenakshi, Dr. Shashi Bala, Mrs. P. Sudha, Mr. S. Soucenadin,
Dr. E. Philip, Mrs H.B.Anuradha, Miss Mary Cynthia Miss Bhargavi and Mr. Krishniah, for their assistance and cooperation during the course of this research work. The congenial, cooperative and healthy atmosphere of the aerobiology and allergy laboratory has played a vital role in helping me during my laboratory work. Under the able tutelage of Prof. Agashe, it has been possible for me to carry out my research efficiently.

My grateful thanks goes to Dr. Kameshwara Rao, Dr. S.B. Sullia, Dr. Sivaramakrishnan and other staff members of the Botany Dept. for their assistance. I also acknowledge the cooperation given by Dr. Kanaka Rao, Medical officer of the ISRO Satellite center during my work.

Through these lines I wish to convey my heartfelt appreciation for the encouragement and the moral support provided by Dr. (Mrs) Nirmala Agashe, during my period of research work.

I thank the officials of VITM and Central Observatory, Bangalore for permitting me to install the pollen samplers at their centers, and also for providing necessary meteorological data.

I am indebted to the University Grant Commission and Indian Council of Medical Research, New Delhi for awarding me the Junior and Senior Research Fellowships which enabled me to carry out this research work.

Lastly, but by no means the least, I owe all my joy I derive out of the completion of this study, to all those dear friends of mine in Bangalore University, the University of Agricultural Sciences Bangalore, the Indian Institute of Sciences, India, and my Sudanese friends whose cheerful and genuine intimacy, ever kept me going
through the various stages of the study all these years and their associations shall ever remain green in my mind.

ABDEL GADIR EL-FADIL ABDEL GADIR.
