Abstract........................................... xiii

I
INTRODUCTION..................................... 1

II
REVIEW OF LITERATURE.......................... 8

a. Evolution of the concept of self in Psychology.......................... 9
b. Studies on self-concept in psychiatric patients......................... 25
c. Studies from growth-oriented view points............................... 45
d. Anxiety and self-concept............................................. 69

III
PRESENT STUDY.................................... 79

Purpose, Objectives, and Scope.................. 79
Statement of the problem and definition of key words....................... 81
Formulation of the Hypotheses.................... 84
Research Design.................................... 84
Sample............................................ 84
Source and mode of selection........................ 88
Description of the study group.................... 90
Tools and techniques of investigation............. 93
1. Case history, symptomatology and socio-demographic data-sheet......... 94
2. The Tennessee self-concept scale.................. 96
3. The Self Confidence Inventory................... 108

Chapter CONTENTS Page No.

III 4. The Personal Orientation Inventory................................. 110
      5. The Experience Inventory................................. 116
      6. The Personal Opinion Survey............................. 119
      7. The IPAT Anxiety Scale Questionnaire......................... 123
         Pilot Study........................................ 128
         Data Collection.................................... 129
         Analysis of the data................................ 131

IV  Analysis and Results of the Data........................................ 132
      Analysis of variance on test measures.......................... 133
      Pearson product moment correlations on test measures........... 146
      Multiple discriminant function analysis.......................... 170
      Test measures........................................ 175
      Case history and symptomatology data............................ 184

V  DISCUSSION.................................................. 205
      Discussion based on Analysis of Variance.......................... 233
      Discussion based on Pearson Product Moment Correlation........... 246
      Discussion based on Multiple discriminant function analysis........ 270
      Implications of the present study............................... 389
      Lacunae in the present study................................ 391

VI  SUMMARY AND CONCLUSIONS........................................ 392
BIBLIOGRAPHY

APPENDICES

A. Chi-square results based on case history, symptomatology and socio-demographic data sheet

B. Case history, symptomatology and socio-demographic data-sheet

C. Tennessee Self Concept Scale

D. The Self-confidence Inventory

E. Personal Orientation Inventory

F. Experience Inventory

G. Personal Opinion Survey

H. IAT-Anxiety Scale Questionnaire

I. Pearson Product moment correlation co-efficients based test measures

J. Formula for obtaining discriminant scores

K. Formula used to identify best discriminating variables between groups
