ACKNOWLEDGEMENTS

The author records his profound reverence and indebtedness to Dr. (Mrs.) I. Manorama Thomas, B.Sc., (Hons.), M.B.B.S., M.S., Professor and Head, Department of Anatomy, Head, Division of Human Genetics, for suggesting the present problem for the Doctoral work. The completion of this investigation and the presentation of the Thesis is mainly due to the untiring encouragement and guidance rendered by her. The author gratefully acknowledges the same.

The fruitful consultation with Prof. J.C.V. Sastry, Professor of Geology, Dr. S.N. Hegde, Reader in Zoology, Prof. N.R. Madhyasta, Professor of Statistics of Mysore University, Mysore and Mr. As Mohammad, Assistant Professor of Statistics, St. John's Medical College, Bangalore, were very useful in the preparation of the Thesis. Their help and assistance is gratefully acknowledged.

His thanks are due to Dr. Iqbal Begum, Joint Director, Dr. Nagaraja Rao and Dr. Venkatarama Gupta, Deputy Directors, and the staff of the Lady Wellingdon State Tuberculosis Centre, for providing the patient
material. The author is specially thankful to Mr. S. Chyntanya Murthy, Mr. K. A. Shamanna, Mr. S. Venugopal Mrs. Jamuna, Mrs. Swarna and Mrs. Rajambal for their help.

Encouragement given by Dr. John A. Thomas, Professor and Head, Department of Pathology, and Dr. Srinivas, Professor of Microbiology, is heartily acknowledged.

The author wishes to thank Dr. G. Mascarenhas and Dr. A.F.A. Mascarenhas, for allowing the utilisation of the facilities of the college for this investigation.

Thanks are due to my colleagues in the laboratory, Mr. N.A. Manjunath, Mr. R. Vikram Jayanth, Mrs. Mythili Jagannath, Mrs. Sayee Rajangam, Sr. Doris D Souza, Dr. Sridevi Hegde, Mr. Sagayaraj, Mr. Samuel, Mrs. Jayalakshamma, Mrs. Shavanthi Lincoln, Mr. Doss and Mrs. Molly Jose, Mrs. Millicent James and Mr. Amalaraj for their help at different stages of this work.

The author wishes to thank the Indian Council of Medical Research, New Delhi, for their financial support in the last phases of this work in the form of a Junior Research Fellowship.
Thanks are to all those patients who have rendered full co-operation.

The help received from different individuals either directly or indirectly during the progress of this work is acknowledged.
