CONTENTS

A. LIST OF TABLES  I - III

B. LIST OF FIGURES  IV - VII

1. INTRODUCTION  1 - 17

1.1 Historical Background  1
1.2 Prevalence  3
1.3 Bacteriology  5
1.4 Pathology  6
1.5 Genetic Studies in Tuberculosis  10
1.6 Cytogenetic Studies in Tuberculosis  12
1.7 Chemotherapy and its evaluation  12

2. REVIEW OF LITERATURE  18 - 55

2.1 CHROMOSOMAL ABERRATIONS  187

2.1.1 Origin and Mechanism  19
2.1.2 Classification  23
2.1.3 Significance  27
2.1.4 Previous studies with bacterial diseases and drugs  28

2.2 SISTER CHROMATID EXCHANGES

2.2.1 Historical perspectives  34
2.2.2 Mechanism of formation  36
2.2.3 Biological significance  37
2.2.4 Previous studies with bacterial diseases and drugs  39

2.3 CELL CYCLE KINETICS  42

2.4 MITOTIC INDEX  46

2.5 DRUG PROFILE  51

3. MATERIAL AND METHODS  56 - 78

3.1 MATERIAL
3.1.1 Sample selection 56
3.1.2 Sample size 57
3.1.3 Sample source 64

3.2 METHODS

3.2.1 Selection of a test system 64
3.2.2 Culture media preparation 65
3.2.3 Setting up of cultures 66
3.2.4 Harvesting of cultures and preparation of slides 67
3.2.5 Staining 66
3.2.6 Plan of analysis 69
3.2.7 Statistics 77
3.2.8 Photography 77

4. RESULTS 79 - 170

4.1 BEFORE TREATMENT

4.1.1 Chromosomal aberrations 80
4.1.2 Sister Chromatid Exchanges 87
4.1.3 Cell cycle kinetics 89
4.1.4 Mitotic index 89

4.2 AFTER TREATMENT

4.2.1 Chromosomal aberrations 90
4.2.2 Sister Chromatid Exchanges 99
4.2.3 Cell cycle kinetics 103
4.2.4 Mitotic index 106

5. DISCUSSION 171 - 188

5.1 Before treatment 171
5.2 After treatment 177

6. SUMMARY 189 - 198

7. CONCLUSION 199 - 201

8. BIBLIOGRAPHY i -

9. APPENDIX

9.1 Abbreviations
9.2 Proforma
9.3 Method of X-ray and Sputum examination
