Chapter 1: Introduction

I.1 Introduction 1
I.2 Nutrition and nutrients 2
I.3 Relationships between nutrition and health 4
I.4 Importance of wild leafy vegetables 6
I.5 Importance of mineral in human health 8
I.6 Antioxidant activity and its impact on human health 13
I.7 Polyphenols content in vegetables 15
I.8 Vitamin C content of vegetables 18
I.9 Dietary fibre content of vegetables 19
  I.9.1 What is dietary fibre? 19
  I.9.2 Dietary fibre and health benefits 21
  I.9.3 Functional property of dietary fibre 23
I.10 Proximate composition 24
I.12 Objective of the work 29
References 30
Chapter II: Antioxidant Activity of the Wild Green Leafy Vegetables

II.1 Introduction

II.2 Materials and methods

II.2.1 Chemicals and reagents

II.2.2 Plant materials

II.2.3 Preparation of extracts

II.2.4 Estimation of total antioxidant activity

II.2.4.1 DPPH free radical scavenging assay

II.2.4.2 ABTS cation scavenging assay

II.2.4.3 FRAP assay

II.2.5 Statistical analysis

II.3 Results and Discussion

II.3.1 Results of DPPH free radical scavenging assay

II.3.2 Results of ABTS cation scavenging assay

II.3.2 Results of FRAP assay

II.3.4 Effect of cooking on antioxidant activity

II.5 Conclusion

References

Chapter III: Phenolic Content and Antioxidant Activity

III.1 Introduction

III.2 Materials and methods

III.2.1 Chemicals and reagents

III.2.2 Plant materials

III.2.3 Preparation of extracts

III.2.4 Determination of total phenolic content

III.2.5 Determination of total flavonoid content

III.2.6 Determination of vitamin C content

III.2.7 Statistical analysis
V.2.4.3 Estimation of proximate composition 127

V.2.5 Statistical analysis 128

V.3 Results and discussion 129-138

V.3.1 Dietary fibre content 129

V.3.2 Effect of cooking on dietary fibre 131

V.3.3 Functional property of the insoluble dietary fibre (IDF) 133

V.3.4 Proximate composition 135

V.4 Conclusion 138
