ACKNOWLEDGEMENTS

I would first of all, like to thank Almighty for all that I had been able to achieve in these last few years. These four years of Ph.D. have brought an immense transformation in me both on professional and personal grounds.

It gives me immense pleasure to acknowledge the enthusiastic and critical supervision of Professor S.C.Bhatla. I thank him from the bottom of my heart for all those invaluable discussions and comments, constant help in experimental plans and stimulating encouragement. His constant guidance and motivation enabled me to achieve two international publications in the initial two years of my work. His constant inspiration and totally supervisory figure enabled me to have a glance in the international research. He has always been more than a just being a supervisor for me and I have knowingly or unknowingly imbibed many things from him. His positive outlook towards life, thrust for knowledge and deep intuitions will always enlighten my life. His suggestions and constructive examination of the work has made the compilation of the thesis possible.

I also thank Professor I. Usha Rao (former Head of the Department) and Professor S.C.Bhatla (present Head of the Department) for providing the necessary facilities for research and also constant encouragement. I would also like to thank Professor A.K.Bhatnagar and Professor S.B.Babbar (members of the Advisory Committee) for critically examining my work and providing valuable suggestion and comments. I would also express my thanks to the technical officers Mr. Raheja and Ms. Neena and Mr. Dass for providing their help whenever needed. I would also like to thank the staff of Department of Botany for availing themselves with help in the situations required.

I gratefully acknowledge the financial support provided by Council of Scientific and Industrial Research (CSIR) in the form of research fellowship. I would also like to acknowledge the DAAD (German Academic Exchange Service) for providing me with the fellowship and all the required amenities during my short term visit to Germany. I extend my warm thanks to Dr. František Baluška, IZMB, Department of Plant Cell Biology, Rheinische Friedrich-Wilhelms-Universitaet Bonn, Germany, for providing the research facilities during the part of Alexander von Humboldt Project. I also acknowledge Boris, Christian, Akansha and other members of the department for providing friendly environment.

I would also express my sincere thanks to Professor Ashok Prasad and Vivek of Department of Chemistry for their indebted help and involvement in accomplishing a part of my work.
Thanks are due to Dr. Souvik Maiti at the Institute of Genomics and Integrative Biology, Delhi for providing the required help during spectrfluorometric analysis.

I also deeply acknowledge Dr. Rajendra Prasad, Natioanl Seed Project, UAS, GVKV, Banglore for providing the seeds of sunflower (Helianthus annuus L., cv. Morden), my research material during the course of work.

A cordial and extended thanks to all those amazing colleagues who have not only provided a working environment in the laboratory but also a family like atmosphere. It has been a pleasure to share these years of my life with most wonderful colleagues like Shweta, Rashmi, Vibha, Mukesh, Anisha, Basudha, Anita, Soumya, Niharika, Prachi and Neha. They not only participated in fruitful discussions but also helped me in developing solutions to the identified problems. I would also like to thank my friends and fellow colleagues from other laboratories.

I would thank God for blessing me with many good friends without whom I would have never thought of accomplishing this task. I owe my heartiest and deepest feelings to them for all care, love, understanding and continuous support through all twists and turns. I would like to thank Priyanka and Rashi for their long discussions and highly inspirational thoughts and ideas in lifting me up. Thanks to Nikhil for being the trigger point of all positivities. I also extend my warm and compassionate thanks to Anu for being a true and complete friend, in handling me through all circumstances. She brought all joy and positivity along with her at the time when it was most needed. An exceptional thanks to my two lovely friends Poonam and Manjeet who always made me realize my capabilities and reenergising me for the new dawns to come. I would also like to thank Dinesh and Bharat for supporting and guiding me through all these years. A special thanks to Shiva, Hanna, Christaine, Jey and Melanie for providing an unforgettable and wonderful time out there in an unknown land.

Lastly, I express my sincere gratitude and loving thanks to my family for their love, faith, understanding, care, constant encouragement, infinite patience and handling me in all ups and downs of my life. A special thanks to my siblings Sonu and Isha for cheering me in all those tight situations and having a constant faith in my abilities. An incomparable thank to my grandparents for their blessings and faith in me. An extended thank to my cousin Anil for constantly pushing me through situations and peping me up always.

Thank you all for being there with me.

Sunita
