Introduction 1-5

Review of Literature 6-49

I. Immunological tolerance and autoimmunity 6
II. Genetic basis of autoimmunity 8
   A. Major Histocompatibility Complex 9
   B. Cytotoxic T lymphocyte antigen 4 10
   C. Autoimmune regulator 11
   D. FOXP3 (encoding a transcription factor of the forkhead family) 12
   E. Genetics of common autoimmune diseases 12
      a. Cytokine polymorphism in autoimmune diseases 14
      b. Genetic polymorphisms in xenobiotic-metabolising enzymes 16
III. Environmental triggers in autoimmune diseases 17
   A. Pesticides and xenobiotics 17
   B. Infectious agents 20
      a. Bacterial superantigens 23
      b. Viral agents 27
IV. T cells, T-cell receptor and autoimmunity 30
   A. Regulation of immunity by self-reactive T cells 34
   B. T regulatory cells and autoimmune skin diseases 35
V. Autoimmune skin diseases 37
   A. Pemphigus 39
   B. Scleroderma 43
   C. Systemic lupus erythematosus 45

Aims and Objectives 50

Materials and Methods 51-60

I. Patients and samples 51
II. Skin delayed hypersensitivity testing 51
III. PBMC preparation 52
IV. Stimulation of PBMCs 52
V. Staining of PBMCs and Fluorescence-activated cell sorting 54
VI. Cytokine quantification ELISAs 55
VII. Extraction and quantification of pesticides from blood samples 55
VIII. Stool examination for helminthic infections 56
IX. Genomic DNA extraction 57
X. Cytokine genotyping 58
XI. Statistical analysis 60

Chapter I: Pemphigus 61-93
I. Introduction 61
II. Results 64
A. Levels of organochlorine pesticides in the peripheral blood of pemphigus patients 64
B. Changes in T-cell subpopulations in pemphigus upon superantigen stimulation \textit{in-vitro} 65
C. Changes in T-cell subpopulations in pemphigus upon cytomegalovirus antigen stimulation \textit{in-vitro} 68
D. Skin delayed hypersensitivity reaction 69
E. Changes in T-cell subpopulations in pemphigus upon recall antigen stimulation \textit{in-vitro} 70
F. Changes in T-cell subpopulations in pemphigus upon HCH and DDT exposure \textit{in-vitro} 72
G. FOXP3 expression by CD4^+CD25^+ T-cells in pemphigus patients 76
H. Effect of \textit{in-vitro} stimulation of PBMCs with different antigens/stimulants on the secretion of IL-2, IL-4, IL-10, and IFN-\gamma in pemphigus patients 77
I. Cytokine gene polymorphism in pemphigus 80
J. Summary of the results 85

III. Discussion 86

Chapter II: Scleroderma (Systemic sclerosis) 94-131
I. Introduction 94
II. Results

A. Levels of organochlorine pesticides in the peripheral blood of SSc patients

B. *In-vitro* T-lymphocyte response to superantigen stimulation in SSc

C. *In-vitro* T-lymphocyte response to cytomegalovirus antigen stimulation in SSc

D. Skin delayed hypersensitivity reaction

E. *In-vitro* T-lymphocyte response to recall antigen stimulation in SSc

F. *In-vitro* T-lymphocyte response to organochlorine pesticide exposure in SSc

G. FOXP3 expression by CD4⁺CD25⁺ T-cells in SSc patients

H. Effect of *in-vitro* stimulation of PBMCs with different antigens/stimulants on the secretion of IL-2, IL-4, IL-10, and IFN-γ in SSc patients

I. Cytokine gene polymorphism in systemic sclerosis

J. Summary of the results

III. Discussion

Chapter III: Systemic Lupus Erythematosus

I. Introduction

II. Results

A. Levels of organochlorine pesticides in the peripheral blood of SLE patients

B. Effects of *in-vitro* stimulation with SPEA and SEB on T-lymphocyte subpopulations in SLE patients

C. Effects of *in-vitro* stimulation with cytomegalovirus antigen on T-lymphocyte subpopulations in SLE patients

D. Skin delayed hypersensitivity reaction

E. Effects of *in-vitro* stimulation with CA and PPD on T-lymphocyte subpopulations in SLE patients

F. Effects of *in-vitro* exposure to HCH and DDT on T-lymphocyte subpopulations in SLE patients

G. FOXP3 expression by CD4⁺CD25⁺ T-cells in SLE patients
H. Effect of *in-vitro* stimulation of PBMCs with different antigens/stimulants on the secretion of IL-2, IL-4, IL-10, and IFN-γ in SLE patients 151
I. Cytokine gene polymorphism in SLE 154
J. Summary of the results 159

III. Discussion 160

**Summary and Conclusions** 175-183

I. Pemphigus 175
II. Scleroderma (Systemic sclerosis) 177
III. Systemic Lupus Erythematosus 180

**References** 184-238

**List of Publications** 239-241
