List of Tables

Table 1: Factors affecting the adoption of GM crops ................................................................. 67
Table 2: Adoption related studies made on GM crop technology and Bt cotton................................. 70
Table 3: Countries producing GM crops (2011) ......................................................................... 84
Table 4: Advent of GM cotton technology in GM cotton producing countries .............................. 87
Table 5: Advent and withdrawal of GM cotton across some of the countries .............................. 91
Table 6: Cotton production and productivity in India .............................................................. 102
Table 7: Cotton production and productivity in northern zone ................................................ 103
Table 8: Cotton production and productivity in southern zone ................................................ 103
Table 9: Cotton production and productivity in central zone .................................................... 104
Table 10: List of Bt cotton events approved for cultivation in India ........................................ 121
Table 11: Expansion in the area under Bt cotton in India since its launch (per cent) ...................... 124
Table 12: Definition and measurement of the variables used ..................................................... 131
Table 13: Distribution of farmers surveyed into Bt and non Bt users ........................................ 132
Table 14: Summery of the age of Respondent farmers ............................................................... 133
Table 15: Summery of experience of Respondent farmers in growing Cotton .............................. 133
Table 16: Cross tabulation between Age of the respondent farmers and their experience in cultivating cotton (Number of Years) ................................................................. 134
Table 17: Number of education years of the respondent farmers ................................................. 134
Table 18: Highest educated member in the respondent’s family .................................................. 135
Table 19: Cross tabulation between the number of education Year of the Respondent With the member with highest education Year in the family ................................................................. 135
Table 20: Percentage of farmer’s own land under cotton to total land area under cotton (OLC/TLC) ................................................................................................................................. 136
Table 21: Percentage of total irrigated land to total area under cotton (TLI/TLC) ......................... 136
Table 22: Percentage of yearly agricultural income to annual family income (YAI/YFI) .................. 147
Table 23: Percentage of yearly income from Cotton to yearly agricultural income (YCI/YAI) .......... 137
Table 24: Percentage of total land under Cotton to total land area under production (TLC/TLP) ..... 138
Table 25: Number of pesticides sprays made in Current cultivation cycle .................................. 138
Table 26 a: Bt seeds used per acre .................................................................................................. 139
Table 26 b: Non Bt seeds used per acre ........................................................................................ 139
Table 27: Usage of fertilizers per acre on Bt and Non Bt cotton crops ........................................ 141
Table 28: Relationship of Age of the farmer and Adoption ........................................................... 142
Table 29: Relationship of experience of the Farmer and Adoption .................................................. 143
Table 30: Relationship of number of year of farmers education and Adoption ......................... 144
Table 31: Relationship of farmer’s own land under Cotton to total land area under cotton and Adoption .................................................................................................................. 145
Table 32: Relationship of total land under Cotton to total land area under production and Adoption .................................................................................................................................. 147
Table 33: Relationship of yearly income from Cotton to yearly agricultural income and Adoption ?? 148
Table 34: Relationship between Importance of Government seed shops as a source of procurement and Adoption .................................................................................................................................. 149
Table 35: Relationship between Importance of fairs organized by the university as a seed procurement source and Adoption ........................................................................................................... 151
Table 36: Relative importance of various sources of seeds purchase (preference index scores) ........ 153
Table 37: Relationship between Importance of farmers in spreading awareness of Bt Non Bt brands and Adoption .................................................................................................................. 153
Table 38: Relationship between Importance of television in spreading awareness of Bt Non Bt brands and Adoption .................................................................................................................. 153
Table 39: Relationship between Importance of company representatives in spreading awareness of Bt Non Bt brands and Adoption ............................................................................................................ 154
Table 40: Relationship between Importance of fairs organized by university in spreading awareness of Bt \\ Non Bt brands And Adoption ................................................................. 155

Table 41: Relationship between Importance of agriculture area development officer in spreading awareness of Bt \\ Non Bt brands and Adoption................................................................. 155

Table 42: Relative importance of various sources for spreading awareness of about Bt \\ non Bt brands (preference index scores) .......................................................................................... 156

Table 43: Relative Importance of Various Sources in spreading awareness regarding certification of Bt Cotton seeds \\ Brands (preference index scores) ................................................................. 158

Table 44: Relationship between Importance of loan taken from lenders as source to finance purchase of seeds in recent cultivation cycle and Adoption ......................................................... 159

Table 45: Relationship between Importance of loan taken from banks as source to finance purchase of seeds in recent cultivation cycle and Adoption ......................................................... 160

Table 46: Relationship between Importance of income from last crop as source to finance purchase of seeds in recent cultivation cycle and Adoption ......................................................... 160

Table 47: Relative importance of various financing sources used to fund cultivation in recent cultivation cycle (preference index scores) .................................................................................. 161

Table 48: Relative importance of Various reasons for Bt Adoption ......................................................... 162

Table 49: Relative importance of various reasons for non-adoption of Bt cotton seeds ......................... 163

Table 50: Satisfaction of the respondents – Bt and Non Bt on various factors (preference index scores) ........................................................................................................................................ 164

Table 51: Relative importance of various factors in motivating farmer to purchase Bt cotton seeds for the first time of Bt ........................................................................................................ 165
