ACKNOWLEDGMENT

A formal statement of acknowledgement is hardly sufficient to express my gratitude towards the personalities who have persuaded me and ensured that I make an effort to write this thesis.

Nevertheless, I place on record the unflinching belief of my supervisors, Dr. Y C. Chopra, ex Professor and Head, Dept. of Electronics & Electrical Communication Engineering, PEC, Chandigarh and Dr. T. S. Kamal, ex Professor, Department of Electronics and Electrical Communication Engineering, PEC, Chandigarh, in me. Without their moral boosting, supervision, constructive criticism, and time extended to me, this thesis probably would not have been written.

I acknowledge the support extended to me by Principals, Dr. Rajnish Prakash and Dr. Baljeet Kapoor of Punjab Engineering College. Dr. Vijay Gupta and Dr. Manoj Datta, the Directors of PEC University of Technology have also been considerate to my shyness of writing the thesis.

I find no words to acknowledge the sacrifice, help and inspiration rendered to me by my wife Dr. Indu Rihani. She never lost any opportunity to buck me up and has always been there to support me. My children, Ms. Shikha Gulati and Mr. Sahil Rihani, have with their silence, shown faith in me.

I am thankful to Dr. S C Vaidya of Panjab University, Dr. S. P. S Grewal of Grewal Eye Institute, Chandigarh, and SASE for providing an environment for collecting the real data.

I acknowledge the help rendered to me by postgraduate students.

(Virender Rihani)
