Fig. 1 Conceptual Framework of the Study: Quality Assurance Cycle
(Model Adopted by American Nurses Association: modified).

I Identify values: Perception of health professionals on performance

II Selecting a topic: Expanded roles of nurses and assessment of their performance
- Practitioner
- Educator
- Leader
- Communicator
- Evaluator

III Setting standards and criteria for each different role

IV Secure measurement needed to determine degree of attainment of standard and criteria
(Administering a self-administered questionnaire)

V Make interpretation of perception

VI Identify possible courses of action: Formulate Strategies to improve quality care

VII Take Action to Improve Quality Care

Take Action to Improve Quality Care
