## CHAPTER –I

### INTRODUCTION

1.1 Atmospheric Boundary Layer | 1  
1.1.1 Significance of the Boundary layer | 3  
1.2 Soil | 4  
1.3 Soil-air interface | 5  
1.4 Soil temperature | 6  
1.5 Soil temperature and its importance | 7  
1.6 Variation of soil temperature | 8  
1.6.1 Annual variation of soil temperature | 9  
1.6.2 Diurnal (Daily) variation of soil temperature | 10  
1.7 Soil temperature variation with time and depth | 11  
1.8 Factors affecting soil temperature | 12  
1.8.1 Solar radiation (Sunshine) | 12  
1.8.2 Wind | 13  
1.8.3 Evaporation and condensation | 13  
1.8.4 Rainfall or Precipitation | 14  
1.8.5 Relative humidity | 14  
1.8.6 Vapour pressure | 15  
1.8.7 Air temperature | 15  
1.8.8 Soil moisture | 15  
1.9 Temperature profile | 16  
1.10 Thermal wave | 17  
1.11 Thermal mapping | 19  
1.12 Soil thermal properties | 20  
1.12.1 Specific heat | 20  
1.12.2 Heat capacity (Volumetric heat capacity) | 21  
1.12.3 Thermal conductivity | 21  
1.12.4 Thermal diffusivity | 21  
1.13 Soil thermal wave characteristics | 22  

xi
| 1.13.1  | Amplitude                                      | 22 |
| 1.13.2  | Range of soil temperature                      | 23 |
| 1.13.3  | Rate of change of temperature                  | 23 |
| 1.13.4  | Soil heat flux                                 | 23 |
| 1.13.5  | Soil heat budget                               | 24 |
| 1.13.6  | Damping depth                                  | 24 |
| 1.13.7  | Extinction co-efficient                         | 25 |
| 1.13.8  | Time lag                                       | 25 |
| 1.14    | Rainfall                                       | 25 |
| 1.14.1  | Classification of rainfall                     | 26 |
| 1.14.2  | Climatic classification                        | 27 |
| 1.14.3  | Effects of rainfall                            | 27 |
|         | 1.14.3.1 Drought                               | 28 |
|         | 1.14.3.2 Climate change                        | 28 |
|         | 1.14.3.3 Variation of monsoon                  | 29 |
| 1.15    | Monsoon                                        | 30 |
| 1.15.1  | South West Monsoon (SWM)                       | 31 |
| 1.15.2  | North East Monsoon (NEM)                       | 31 |
| 1.15.3  | Onset of monsoon                               | 32 |
| 1.15.4  | Withdrawal of monsoon                          | 32 |
| 1.16    | Monsoon forecasts                              | 32 |
| 1.17    | Environment                                    | 33 |
| 1.18    | Western Ghats                                  | 34 |
| 1.19    | Scope of the study                             | 35 |
| 1.20    | Objectives of the study                        | 37 |

**CHAPTER –II**

**REVIEW OF LITERATURE**

| 2.1     | Introduction                                   | 40 |
| 2.2     | Atmospheric Boundary Layer (ABL)               | 40 |
| 2.3     | Soil–air interface                             | 41 |
| 2.4     | Soil moisture                                  | 42 |
| 2.5     | Soil temperature                               | 43 |
| 2.6     | Air temperature                                | 46 |
| 2.7     | Soil–air temperature                           | 47 |
CHAPTER III
DATA AND METHODOLOGY

3.1 Introduction 79
3.2 Experimental sites 80
   3.2.1 Killikulam 81
      3.2.1.1 Landscape 82
      3.2.1.2 Weather conditions 82
   3.2.2 Pechiparai 83
      3.2.2.1 Landscape 83
      3.2.2.2 Weather conditions 83
3.3 Data collection 84
3.4 Thermal mapping 84
   3.4.1 Annual soil temperature wave characteristics 85
      3.4.1.1 Range of soil temperature 85
      3.4.1.2 Rate of change of temperature per week 86
      3.4.1.3 Soil heat budget 86
      3.4.1.4 Soil heat flux 87
      3.4.1.5 Damping depth 87
      3.4.1.6 Extinction coefficient 88
      3.4.1.7 Time lag 88
3.5 Thermal characteristics of soil 89
   3.5.1 Thermal conductivity 89
   3.5.2 Thermal diffusivity 90
3.6 Weather classification 91
3.7 Predictions of Boundary layer climates using Back Propagation Algorithm (BPA) 92
3.8 Modes of analysis 93
3.9 Artificial neural network 94
   3.9.1 Inputs and outputs 95
3.23 Probability pattern of rainfall (Drought statistics) 119
3.24 Crop Rainy Days (CRD) analysis 119
3.25 Rain spell characteristics 121

CHAPTER IV
THERMAL MAPPING AND THERMAL WAVE CHARACTERISTICS OF ANNUAL SOIL TEMPERATURE

4.1 Introduction 122
4.2 Annual variations of soil temperature 123
  4.2.1 Annual variation of soil temperature at Killikulam 123
    4.2.1.1 Annual variation of soil temperature during 2008 123
    4.2.1.2 Annual variation of soil temperature during 2009 124
    4.2.1.3 Annual variation of soil temperature during 2010 125
    4.2.1.4 Annual variation of soil temperature during 2011 126
    4.2.1.5 Annual variation of soil temperature during 2012 127
4.3 Annual variations of soil temperature at Pechiparai 128
  4.3.1 Annual variation of soil temperature during 2006 128
  4.3.2 Annual variation of soil temperature during 2007 129
  4.3.3 Annual variation of soil temperature during 2008 130
  4.3.4 Annual variation of soil temperature during 2009 131
  4.3.5 Annual variation of soil temperature during 2010 131
  4.3.6 Annual variation of soil temperature during 2011 132
  4.3.7 Annual variation of soil temperature during 2012 133
  4.3.8 Annual variation of soil temperature during 2013 134
4.4 Annual air temperature variation 135
  4.4.1 Annual variation of air temperature at Killikulam from 2008 to 2012 135
  4.4.2 Annual variation of air temperature at Pechiparai from 2007 to 2013 136
4.5 Annual soil thermal wave characteristics 136
  4.5.1 Range of temperature 137
  4.5.2 Rate of change of temperature per week 139
  4.5.3 Soil heat budget 142
  4.5.4 Soil heat flux 144
4.5.5 Thermal diffusivity 147
4.5.6 Damping depth 149
4.5.7 Extinction coefficient (m$^{-1}$) 150
4.5.8 Time lag 151

4.6 Locational comparison of meteorological parameters 153
4.6.1 Geographical configuration of Killikulam and Pechiparai 153
   4.6.1.1 Killikulam 153
   4.6.1.2 Pechiparai 154
4.6.2 Weather conditions of Killikulam 155
4.6.3 Weather conditions of Pechiparai 156

4.7 Locational comparison of meteorological parameters 157
4.7.1 Comparative chart of annual and monthly mean soil temperature 157
4.7.2 Comparative chart of air temperature 158
4.7.3 Comparative bar diagram of rainfall 158
4.7.4 Comparative bar diagram of relative humidity 159
4.7.5 Comparative bar diagram of wind speed 160
4.7.6 Comparative bar diagram of sunshine 160
4.7.7 Comparative bar diagram of evaporation 161

4.8 Conclusion 161

CHAPTER V
PREDICTIONS OF BOUNDARY LAYER CLIMATES USING BACK PROPAGATION ALGORITHM (BPA)

5.1 Introduction 163
5.2 List of predictions 164
5.3 Prediction of soil temperature 165
   5.3.1 Prediction of soil temperature at 0.1 m depth using soil temperature at the same depth at Killikulam 165
   5.3.2 Soil temperature at 0.05 m depth using soil temperature at the same depth at Pechiparai 166
5.4 Prediction of air temperature from soil temperature 167
   5.4.1 Air temperature using soil temperature (0.1 m depth) at Killikulam 167
   5.4.2 Air temperature using soil temperature (0.1 m depth) at Pechiparai 168
CHAPTER V
ENVIRONMENTAL IMPACT BASED ON METEOROLOGICAL PARAMETERS

5.5 Prediction of soil temperature from one to another level

5.5.1 Soil temperature of 0.2 m from 0.1 m soil depth at Killikulam

5.5.2 Soil temperature at 0.15 m from the soil temperature at 0.05 m soil depth at Pechiparai

5.6 Prediction of soil temperature from air temperature

5.6.1 Soil temperature at 0.1 m depth from air temperature at Killikulam

5.6.2 Soil temperature at 0.1 m depth from air temperature at Pechiparai

5.7 Prediction of air temperature from air temperature

5.7.1 Air temperature from air temperature at Killikulam

5.7.2 Air temperature from air temperature at Pechiparai

5.8 Prediction of relative humidity from relative humidity

5.8.1 Relative humidity from relative humidity at Killikulam

5.8.2 Relative humidity from relative humidity at Pechiparai

5.9 Prediction of sunshine from sunshine

5.9.1 Sunshine from sunshine at Killikulam

5.9.2 Sunshine from sunshine at Pechiparai

5.10 Prediction of wind speed from wind speed

5.10.1 Wind speed from wind speed at Killikulam

5.10.2 Wind speed from wind speed at Pechiparai

5.11 Prediction of rainfall from rainfall

5.11.1 Rainfall from rainfall at Killikulam

5.11.2 Rainfall from rainfall at Pechiparai

5.12 Prediction of rainfall from meteorological parameters

5.12.1 Rainfall from all meteorological parameters at Killikulam

5.12.2 Rainfall from all meteorological parameters at Pechiparai

5.13 Model validation

5.14 Conclusion

CHAPTER VI
ENVIRONMENTAL IMPACT BASED ON METEOROLOGICAL PARAMETERS

6.1 Introduction

6.2 Correlation between rainfall and soil temperature
6.3 Rainfall and soil temperature 188
6.4 Significance of the study 190
6.5 Trend observation 192
  6.5.1 Trend analysis of rainfall at Killikulam and Pechiparai 192
6.6 Trend analysis of soil temperature 195
6.7 Monsoon variability 199
  6.7.1 Departure of monthly rainfall at Killikulam and Pechiparai 199
  6.7.2 Annual departure of rainfall at Killikulam and Pechiparai 202
6.8 Seasonal and annual rainfall at Killikulam and Pechiparai 205
6.9 Five year running average of rainfall 209
6.10 Pie chart of mean seasonal rainfall 210
6.11 IMD criteria for rainfall classification 211
6.12 Analysis of drought statistics 216
6.13 CRD analysis 222
  6.13.1 Contribution of Dry Days or rainless days 222
  6.13.2 Drizzle Days 223
  6.13.3 Rainy Days 224
  6.13.4 CRD (Crop Rainy Days) 225
  6.13.5 HR Days 225
  6.13.6 CRD/RD Ratio 226
  6.13.7 MDI (Mean Daily Intensity) 227
6.14 Rain spell characteristics 229
6.15 Conclusion 231

CHAPTER VII
SUMMARY, CONCLUSION AND FUTURE SCOPE
  7.1 SUMMARY 233
  7.2 CONCLUSION 234
  7.3 FUTURE SCOPE 237

REFERENCE 240-254

ANNEXURE
