ACKNOWLEDGEMENT

First and foremost I would like to express my sincere gratitude towards my revered guide Dr. Renu Chadha, Reader in Pharmaceutical Chemistry, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, whose unstinted help, guidance and encouraging attitude inspired me to accomplish this work. It has really been a privilege to work under him.

The words are not sufficient to thank my co-guide Prof. V.K. Kapoor, whose ever-encouraging attitude and keen interest in the project helped in maintaining the tempo throughout the research period. I take this opportunity to express sincere thanks for his unstinted help and affectionate encouragement that have gone long way in completing this work.

I sincerely thank Prof. T.R. Bhardwaj, former chairman and Prof. O.P. Katare, Chairman, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, for providing facilities to carry out the research.

I would like to thank Prof. D.V.S. Jain, for allowing me to work on the instrument and to utilize the facilities and giving the useful suggestions regarding the work.

I am thankful to Ms. Ranjit Kaur for lending her expertise in carrying out FTIR. I am also thankful to Mr. Dhrub Dev, Mr. Shravan, Mr. Kishori Lal, Mr. Ravinder, Mr. Dushyant, Mr. Ramashankar and other laboratory staff.

The work would not have reached the logical conclusion without the support of the Instrumentation section of CIL, Panjab University, Chandigarh. The kind help of Mr. Jagtar Singh for XRD studies is duly acknowledged.

It would not have been possible to stand the thick and thin during the project without the help of my friends who not only provided the lighter moments but also helped in all ways they could, during the course of
work. I would like to thank especially Mr. Aman, Mr. Rakesh Vats, Mr. Gulshan, Mr. Senthil, Mrs. Benu, Mr. Dinesh, Ms. Priyanka, Mr. Gaurav, Mrs. Neelima and Mr. Neeraj. I am also grateful to my Juniors Anupam, Swati, Paramjit, Poonam, Harpreet and Rupinder.

The financial support from UGC is gratefully acknowledged.

I wish there were better words than thanks/indebtedness gratitude to express my feelings towards my family for their love, support, care, inspiration and encouragement without which I would not have been where I am. Last, my wife, Shalu, owes my loving acknowledgement, who helped in all the ways she could. She allowed me all the time, support and other help, without which it would not have been possible for me to concentrate in my studies and bring out this work. I once again thank her for the same. It is to these dear ones that I lovingly and solemnly dedicate my thesis.

Date: 2-01-2006
