PLATES:

PLATE 1: PHOTOGRAPHS OF THE FLOWER/INFLORESCENCE OF SOME
ALLERGENIC PLANTS IDENTIFIED FROM GREATER SILCHAR AREA.

PLATE 2: PHOTOGRAPHS OF THE FLOWER/INFLORESCENCE OF SOME DOMINANT
PLANT SPECIES IDENTIFIED FROM GREATER SILCHAR AREA.

PLATE 3: LIGHT MICROSCOPIC PHOTOGRAPHS OF SOME ALLERGENIC PLANT
POLLENS COLLECTED FROM GREATER SILCHAR AREA.

PLATE 4: LIGHT MICROSCOPIC PHOTOGRAPHS OF SOME POACEAE AND
CYPERACEAE POLLEN GRAINS COLLECTED FROM GREATER SILCHAR AREA.

PLATE 5: LIGHT MICROSCOPIC PHOTOGRAPHS OF SOME DOMINANT POLLEN
TYPES COLLECTED FROM GREATER SILCHAR AREA.

PLATE 6: LIGHT MICROSCOPIC PHOTOGRAPHS OF SOME DOMINANT POLLEN
TYPES COLLECTED FROM GREATER SILCHAR AREA.

PLATE 7: LIGHT MICROSCOPIC PHOTOGRAPHS OF SOME DOMINANT POLLEN
TYPES COLLECTED FROM GREATER SILCHAR AREA.

PLATE 8: SEM PHOTOGRAPHS OF SOME ALLERGENIC POLLEN TYPES COLLECTED
FROM GREATER SILCHAR AREA.

PLATE 9: SCANNING ELECTRON MICROSCOPIC PHOTOGRAPHS OF SOME
DOMINANT POLLEN TYPES COLLECTED FROM GREATER SILCHAR AREA.

PLATE 10: PHOTOGRAPHS OF THE VOLUMETRIC SAMPLER USED FOR
AERIOBIOLOGICAL INVESTIGATION.

PLATE 11: PHOTOGRAPHS OF THE PURE CULTURED COLONY OF SOME SELECTED
FUNGAL SPECIES.

PLATE 12: PHOTOGRAPHS OF SOME PURE CULTURE / MASS CULTURED FUNGAL
SPECIES SELECTED FOR ANTIGEN PREPARATION.
PLATE 13: Light microscopic photographs of some allergenic fungal species collected from Greater Silchar area.

PLATE 14: Light microscopic photographs of some common fungal species identified from Greater Silchar area.

PLATE 15: Light microscopic photographs of some common fungal species identified from Greater Silchar area.

PLATE 16: Scanning Electron Microscopic photographs of some allergenic Aspergillus species identified from Greater Silchar area.

PLATE 17: Scanning Electron Microscopic photographs of some common Penicillium species identified from Greater Silchar area.

PLATE 18: Scanning Electron Microscopic photographs of some dominant fungal species identified from Greater Silchar area.

PLATE 20: Allergy Diagnostic camp organized for clinical examination and in vitro diagnosis of allergy.

PLATE 19: Photographs of some house dust mites collected and identified from the dust samples collected from the allergic patients house.

PLATE 21: Photographs showing the methods adopted for examining the allergic patients at the Allergy Diagnostic camp.

PLATE 22: Photographs showing the result of skin prick test on the selected allergic patients of Greater Silchar area.

PLATE 23: Photographs demonstrating the instruments used for biochemical analysis and clinical examination of allergy.
