CHAPTER-1: INTRODUCTION AND LITERATURE REVIEW	1-18
1.1 Introduction	1
1.2 Significance of the Study	4
1.3 Objectives	7
1.4 Review of Literature	7
CHAPTER-2: STUDY AREA	19-37
2.1 Physical Setting	19
2.1.1 Location	19
2.1.2 Geomorphology	19
2.1.3 Geological Formations	21
2.1.4 Soils	24
2.1.5 Natural Vegetation	27
2.1.6 Surface Water Resources (Streams)	28
2.1.7 Groundwater Resources/Springs	30
2.1.8 Climate	32
2.2 Socio-Economic Setting	33
2.2.1 Population Distribution and Density	33
2.2.2 Sex Composition	35
2.2.3 Literacy Composition	35
2.2.4 Economic Composition	36
CHAPTER-3: DATA BASE AND METHODOLOGY	38-51
3.1 Data Base	38
3.2 Methodological Framework	39
3.2.1 Delineation of the Foot Hills	39
3.2.2 Altitudinal Zonation	40
3.2.3 Generation of other Thematic Map Layers	41

3.2.4 Selection of Sample Sites	42
3.2.5 Collection and Preservation of the Soil Samples	45
3.2.6 Preparation of the Soil Samples for Analysis	46
3.2.7 Collection and Preservation of the Water Samples	46
3.2.8 Analysis of the Soil and Water Samples for pH and OM	47
3.2.8.1 Soil pH	47
3.2.8.2 Water pH	47
3.2.8.3 Organic Carbon in Soil	47
3.2.9 Analysis of the Soil and Water Samples for Cu, Zn and I	48
3.2.10 Framing and Designing of the Household Survey Schedule	48
3.2.11 Socio-economic Survey and Data Tabulation	49
3.2.12 Statistical Analysis	49
3.2.12.1 Statistical Tests	49
3.2.12.2 Computation of Composite Score	51
CHAPTER-4: TRACE ELEMENTS AND HUMAN HEALTH: CONCEPTUAL BACKGROUND	52-65
4.1 Trace Elements: Conceptual Background	52
4.1.1 Goldschmidt's Classification	53
4.1.2 Trace elements in Soils	54
4.1.3 Trace elements in Water	58
4.1.4 Trace elements in Biosphere	59
4.1.5 Trace elements in Human Beings	61
4.2 Human Health: Concept	64
CHAPTER-5: RESULTS AND DISCUSSION	66-124
5.1 Concentration of Essential Trace Elements	66
5.1.1. Concentration of Essential Trace Elements in Lower Foot Hill Settlements-1 (LFHs-1)	66
5.1.2. Concentration of Essential Trace Elements in Lower Foot Hill Settlements-2 (LFHs-2)	71
5.1.3. Concentration of Essential Trace Elements in Upper Foot Hill Settlements (UFHs)	74
5.2 Socio-Economic Determinants of Human Health	89
5.2.1 Dependence of People on Local Foods	89
5.2.2 Cooking Methods	94
5.2.3 Use of Iodized Salt	97
5.2.4 Use of Boiled Drinking Water	98
5.2.5 Households with Different Levels of Income	103
5.2.6 Use of Essential Trace Element Rich Fertilizers	106

LIST OF FIGURES

Fig. No.	Title of the Figures	Page No.
3.1	SOI Toposheets of the Study Area (Number and Arrangement)	38
3.2	Flow Chart of Methodology	40
5.1.1	Relationship of Iodine Concentration with Organic Matter in Soil	76
5.1.2	Relationship of Copper Concentration with Organic Matter in Soil	81
5.1.3	Relationship of Zinc Concentration with Organic Matter in Soil	83
5.2.1	Dependence of People on Locally Cultivated Foods (%)	92
5.2.2	Households using Different Methods of Cooking Food (%)	97
5.2.3	Households using Iodized Salt and Boiled Drinking Water (%)	101
5.2.4	Households in Low Income Group (Rs<5000/month)	105
5.3.1	Persons Suffering from Thyroid Disorders (%)	108
5.3.2	Persons Suffering from Bone and Nerve Ailments (%)	109
5.3.3	Persons Suffering from Diabetes (%)	110
5.3.4	Persons Suffering from Essential Trace Element Deficiency Disorders (%)	115
5.4.1	Trace Element Disease Risk Zonation Map	124
6.1	Transfer and Loss of Essential Trace Elements in the Study Area	132
6.2	Planning Measures for Abatement of Essential Trace Element Deficiencies and Maintenance of Good Health	133

LIST OF MAPS

Map No.	Title of the Maps	Page No.
2.1	Foot Hill Settlements of Pir Panjal Range in Kashmir Valley (Location Map)	20
2.2	Foot Hill Settlements of Pir Panjal Range (Geological Map)	24
2.3	Foot Hill Settlements of Pir Panjal Range (Soil Map)	27
2.4	Drainage Map	31
3.1	Altitudinal Zonation Map	41
3.2	Sample Villages Map	44
3.3	Soil Sample Sites Map	44
3.4	Water Sample Sites Map	45

LIST OF TABLES

Table No.	Title of the Tables	Page No.
2.1	Soil Types with Codes and Characteristics	26
2.2	Demographic and Socio-Economic Profile	33
2.3	Population Distribution, Density and Sex Composition in the Sample Villages	34
2.4	Household Distribution and Density and Literacy Composition and Rate	36
2.5	Economic Population Composition	37
3.1	Sample Frame	42
3.2	Sample Sites with their Codes and Geo-coordinates	43
4.1	Goldschmidt's Classification of the Elements	54
4.2	Influence of Origin of Trace Elements on their Behavior in Soil	55
4.3	Geo-chemical Classification of some Trace Elements	55
4.4	Consequences of Deficiency and Excess of Essential Trace Elements	62
4.5	Recommended Dietary Allowances of I, Cu and Zn for Indians	64
5.1.1	Concentration of Essential Trace Elements in Soils	68
5.1.2	Concentration of Essential Trace Elements in Drinking Waters	70
5.1.3	Shapiro-Wilk's Normality Test in one-way ANOVA: Concentration of Essential Trace Elements in Soils and Drinking Waters	77
5.1.4	Levene's Test of Homogeneity of Variances in one-way ANOVA: Concentration of Essential Trace Elements in Soils and Drinking Waters	77
5.1.5	One-way ANOVA, Welch ANOVA and Games-Howell post-hoc Tests: Concentration of Essential Trace Elements in Soils	78
5.1.6	Shapiro-Wilk's Normality Test in Independent Samples t-Test: Concentration of Essential Trace Elements in Soils and Drinking Waters	79
5.1.7	Levene's Test for Equality of Variances in Independent Samples t-Test: Concentration of Essential Trace Elements in Soils and Drinking Waters	79
5.1.8	Independent Samples t-Test for Equality of Means: Concentration of Essential Trace Elements in Soils and Drinking Waters	79

5.1.9	One-way ANOVA and Tukey post-hoc Tests: Concentration of Essential Trace Elements in Drinking Waters	85
5.2.1	Dependence of People on Locally Cultivated Food Items	92
5.2.2	Shapiro-Wilk's Normality Test in one-way ANOVA: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	93
5.2.3	Levene's Test of Homogeneity of Variances in one-way ANOVA: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	93
5.2.4	One-way ANOVA and Tukey post-hoc Tests: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	93
5.2.5	Shapiro-Wilk's Normality Test in Independent Samples t-Test: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	93
5.2.6	Levene's Test for Equality of Variances in Independent Samples t-Test: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	94
5.2.7	Independent Samples t-Test for Equality of Means: Dependence of People on Locally Cultivated Food Items (%) and Inappropriate Methods of Cooking Food (%)	94
5.2.8	Methods of Cooking Food	96
5.2.9	Households using Iodized Salt and Drinking Boiled Water	100
5.2.10	Shapiro-Wilk's Normality Test in one-way ANOVA: Households using Iodized Salt and Boiled Drinking Water (%)	101
5.2.11	Levene's Test of Homogeneity of Variances in one-way ANOVA: Households using Iodized Salt and Boiled Drinking Water (%)	101
5.2.12	One-way ANOVA and Tukey post-hoc Tests: Households using Iodized Salt and Boiled Drinking Water (%)	102
5.2.13	Shapiro-Wilk's Normality Test in Independent Samples t-Test: Households using Iodized Salt and Boiled Drinking Water (%)	102
5.2.14	Levene's Test for Equality of Variances in Independent Samples t-Test: Households using Iodized Salt and Boiled Drinking Water (%)	102
5.2.15	Independent Samples t-Test for Equality of Means: Households using Iodized Salt and Boiled Drinking Water (%)	102
5.2.16	Households with Different Levels of Income (Rs/month)	104

5.2.17	Shapiro-Wilk's Normality Test in one-way ANOVA: Households in Low Income Group (Rs <5000/month)	105
5.2.18	Levene's Test of Homogeneity of Variances in one-way ANOVA: Households in Low Income Group (Rs <5000/month)	105
5.2.19	One-way ANOVA and Tukey post-hoc Tests: Households in Low Income Group (Rs <5000/month)	105
5.2.20	Shapiro-Wilk's Normality Test in Independent Samples t-Test: Households in Low Income Group (Rs <5000/month)	106
5.2.21	Levene's Test for Equality of Variances in Independent Samples t-Test: Households in Low Income Group (Rs <5000/month)	106
5.2.22	Independent Samples t-Test for Equality of Means: Households in Low Income Group (Rs <5000/month)	106
5.3.1	Prevalence of Thyroid Disorders	108
5.3.2	Prevalence of Bone and Nerve Ailments	109
5.3.3	Prevalence of Diabetes	110
5.3.4	Prevalence of Essential Trace Element Deficiency Diseases	115
5.4.1	Variables (Raw Scores)	121
5.4.2	Standardization of the Variables	122
5.4.3	Computation of the Composite Score	123
5.4.4	Classification of Sample Villages into Five Risk Zones	124

LIST OF PLATES

Plate No.	Title of the Plates	Page No.
1-4	Soil Sampling Methodology of Soils under Forest Land use	i
5-8	Soil Sampling Methodology of Soils under Horticultural Land use	ii
9-12	Soil Sampling Methodology of Soils under Agricultural Land use	iii
13-16	Water Sampling Methodology of Stream Water	iv
17-20	Water Sampling Methodology of Tap Water fed by a Spring/Stream	v
21-24	Water Sampling Methodology of Spring Water	vi
25-36	Socio-Economic and Health Survey	vii-ix

LIST OF ABBREVIATIONS AND CODES

Districts	Codes	Altitudinal Zones (m AMSL)	Codes	Source of Water	Codes	Element	Symbol
Anantnag	ANG	Lower Foot Hills-1 (1800-2100)	LFHs-1	Tap fed by a spring	TSg	Trace Element	TE
Kulgam	KUL	Lower Foot Hills-2 (2100-2400)	LFHs-2	Tap fed by a stream	TSm	Iodine	I
Shopian	SHO	Upper Foot Hills (2400-3000)	UFHs	Stream	Sm	Copper	Cu
Pulwama	PUL			Spring	Sg	Zinc	Zn
Budgam	BUD			Others			Code
Baramullah	BAR			Essential Trace Element Deficiency Disease			ETEDD
