INTRODUCTION 1

REVIEW OF LITERATURE 9
Central Inhibitory Neurotransmitter:
Gamma aminobutyric acid
Distribution of GABA in the CNS
GABA receptor heterogeneity
GABA agonists
GABA uptake blockers
GABA transaminase inhibitors
GABA antagonists
GABAergic synapse
GABA modulators
GABA in neurological and psychiatric disorders
Despair behaviour as a tool to study antidepressant action of Drugs: Role of GABAergic system

AIMS AND OBJECTIVES 94

MATERIALS AND METHODS 103
GABA mediated despair behaviour:
Role of GABA_A and GABA_B receptor subtypes and antidepressant action of drugs.
Involvement of GABAergic agents and clonidine in alternating footshock-induced aggression in mice
Role of GABAergic agents and alpha_2 in reversing chemically (isoniazid (INH)-induced) convulsions in mice
Studies on GABA and nociception
Neuropsychopharmacological profile of fengabine: A GABA receptor agonist
Altered response to GABAergic agents following electro- and chemo-convulsions

Effect of chronic Ro 15-1788 treatment and its withdrawal on cortical and hippocampal EEG activity

RESULTS 122
DISCUSSION 193
