# LIST OF FIGURES

## Chapter 1

<table>
<thead>
<tr>
<th>Figure</th>
<th>Description</th>
<th>Page No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1</td>
<td>Electron Microscopic picture of HPV virus</td>
<td>04</td>
</tr>
<tr>
<td>1.2</td>
<td>Gross specimen of carcinoma cervix</td>
<td>06</td>
</tr>
<tr>
<td>1.3</td>
<td>Microscopic picture of squamous cell carcinoma of cervix</td>
<td>06</td>
</tr>
<tr>
<td>1.4</td>
<td>Schematic presentation of pathogenesis of cancer cervix</td>
<td>07</td>
</tr>
<tr>
<td>1.5</td>
<td>Integration of HPV DNA to host cell of cervix in the genesis of carcinoma cervix.</td>
<td>07</td>
</tr>
<tr>
<td>1.6</td>
<td>Cervical cancer vs. other cancers</td>
<td>11</td>
</tr>
<tr>
<td>1.7</td>
<td>Age-specific rates of HPV infection and cancer</td>
<td>13</td>
</tr>
</tbody>
</table>

## Chapter 2

<table>
<thead>
<tr>
<th>Figure</th>
<th>Description</th>
<th>Page No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1</td>
<td>Characteristics of normal and cancer cell</td>
<td>37</td>
</tr>
<tr>
<td>2.2</td>
<td>Progression to cancer from normal epithelium</td>
<td>55</td>
</tr>
<tr>
<td>2.3</td>
<td>Lag period of carcinoma development</td>
<td>57</td>
</tr>
<tr>
<td>2.4</td>
<td>Cervical cancer screening practice in India</td>
<td>66</td>
</tr>
</tbody>
</table>

## Chapter 3

<table>
<thead>
<tr>
<th>Figure</th>
<th>Description</th>
<th>Page No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>3 (a)</td>
<td>Projection of cervical cancer and death rate by 2025</td>
<td>77</td>
</tr>
<tr>
<td>3 (b)</td>
<td>Working of Registry</td>
<td>87</td>
</tr>
<tr>
<td>3 (c)</td>
<td>Microscopic picture of squamous cell carcinoma of cervix</td>
<td>113</td>
</tr>
<tr>
<td>3 (d) &amp; (e)</td>
<td>Electron Microscopic picture of squamous cell carcinoma of cervix 4,000 &amp; 10,000 magnification</td>
<td>114</td>
</tr>
<tr>
<td>3 (f)</td>
<td>Electron Microscopic picture of squamous cell carcinoma of cervix 20,000 magnification</td>
<td>115</td>
</tr>
<tr>
<td>3 (g)</td>
<td>Electron Microscopic picture of adenomacarcinoma of the cervix, with 4,000 magnification</td>
<td>115</td>
</tr>
<tr>
<td>3 (h)</td>
<td>Electron microscopic picture of parts of two adenoma carcinoma 8,000 magnifications</td>
<td>116</td>
</tr>
<tr>
<td>3 (i)</td>
<td>Electron microscopic picture of parts of two adenoma carcinoma 30,000 magnifications</td>
<td>116</td>
</tr>
<tr>
<td>3.1</td>
<td>The Pie Chart showing incidence of carcinoma of cervix</td>
<td>90</td>
</tr>
<tr>
<td>3.2</td>
<td>The Bar Diagram showing relation of age of the occurrence of Carcinoma Cervix</td>
<td>91</td>
</tr>
<tr>
<td>3.3</td>
<td>The Pie Chart showing distribution of Religion</td>
<td>93</td>
</tr>
<tr>
<td>3.4</td>
<td>The Bar Diagram showing relation of Marital Status</td>
<td>95</td>
</tr>
<tr>
<td>3.5</td>
<td>The Bar Diagram showing relation of age at Marriage</td>
<td>97</td>
</tr>
<tr>
<td>3.6</td>
<td>The Bar Diagram showing age at first Pregnancy</td>
<td>99</td>
</tr>
<tr>
<td>3.7</td>
<td>The Bar Diagram showing Relation of Parity</td>
<td>101</td>
</tr>
<tr>
<td>3.8</td>
<td>The Bar Diagram showing Relation of Symptoms</td>
<td>103</td>
</tr>
<tr>
<td>3.9</td>
<td>The line diagram showing Duration of Symptoms</td>
<td>105</td>
</tr>
<tr>
<td>3.10 (a)</td>
<td>The Bar Diagram showing Clinical Presentation</td>
<td>107</td>
</tr>
<tr>
<td>3.10 (b)</td>
<td>The Bar Diagram showing Relation of stages of Disease</td>
<td>109</td>
</tr>
<tr>
<td>3.10 (c)</td>
<td>The Pie Chart showing Histopathology correlation</td>
<td>111</td>
</tr>
<tr>
<td>3.10 (d)</td>
<td>The Bar Diagram showing Treatment received by the cases</td>
<td>117</td>
</tr>
</tbody>
</table>

Chapter : 5

| 5 (a) | Photograph of Prof. Harald zur Hausen (German virologist) discover of HPV virus | 143 |
| 5 (b) | Showing HPV virus and 4 major types | 145 |
| 5 (c) | Characteristics of Koilocytes (HPV infected cell) detected by Pap smear | 179 |
5 (d): LSIL showing cellular architecture of nuclear and cytoplasm both in low power and high power field

5 (e): HSIL showing cellular architecture of nuclear & cytoplasm both in low power and high power field

5 (f): HSIL (Moderate dysplasia) as looked on in histopathological examination

5 (g): Pap smears showing inflammatory smears on both the Photographs

5 (h): Human papillomavirus (HPV)16/18 detection by type specific PCR

5 (i): Detection of HPV 16 by PCR HPV typing with enzyme restriction

5 (j): Detection of HPV-16 PCR product by agarose gel electrophoresis

5 (k): Agarose gel electrophoresis of PCR products of HPV type 16

5 (l): Detection of HPV 18

5.3: The Bar Diagram showing distribution of the study subjects according to the Cervical Cytology Report

5.5: The Pie Chart showing prevalence of HPV infection out of random 100 cases of HPV study

5.6: The Bar Diagram showing distribution of high-risk HPV positive cases in the study sample according to age

5.7: The Bar Diagram showing distribution of high-risk HPV among different Cytology Reports

5.8: The Bar Diagram showing distribution according to high-risk HPV status and age at marriage

5.9: The Bar diagram showing distribution according to high-risk HPV status and number of partners

5.10 (a): The Bar Diagram showing distribution according to high-risk HPV status and smoking
5.10 (b): The Pie Chart showing distribution according to high-risk HPV status and education :: 205
5.10 (c): The Pie Chart showing distribution according to high-risk HPV status and per capita income :: 207

Chapter 6
6.1 & 6.2: Immunohistochemistry picture showing a poorly differentiated squamous cell carcinoma with down regulation of estrogen receptors (ER and PR) :: 231
6.3: Immunohistochemistry picture of LSIL with down regulation of PR (Negative) in both the picture :: 232

Chapter 7
7.1: High pressure oxygen therapy through boyle’s apparatus (Mark II) :: 239
7.2: A case report of oxygen therapy :: 240
7.3: HPV DNA positive before oxygen therapy :: 241
7.4: HPV DNA negative after oxygen therapy :: 241
