ACKNOWLEDGEMENT

‘Everyone you meet during your search for treasure is good and has been sent by God to help you’ said the old man in The Alchemist. The same is applicable for my endeavor in the research arena. In addition to my work this thesis is an outcome of the affection and support of many good people around me who were always there to extend their whole hearted support.

I place on records my heartfelt regards and indebtedness to my PhD supervisor Dr. Arun Kumar Sharma without whom this dream could never have been materialized. He was not only the master mind behind the concept around which this thesis revolves but also used to take keen interest and get into meticulous details regarding the planning and execution of the experiments. He displayed immense patience in making me understand the tactics of planning and execution of experiments and was my friend, philosopher and guide all throughout. He not only taught me science but also imparted lessons on real life. I am grateful to him for the immense faith he had in me that remained undeterred in the worst of situations. His queries on the subject of my research and valuable advices proved to be of immense help in planning the study. The affection in his eyes and encouraging pat on my back provided the necessary vigor to achieve landmarks. I am thankful to God for making him my guide.

I am immensely thankful to my mentor Prof. A. K. Tyagi who was a source of inspiration for me. His valuable suggestions and personal guidance during my experiments are memories of a life time. Despite being posted out to NIPGR his constant perusal of my research work and personal advices at difficult times kept my spirits high.

I place on records my sincere thankfulness to Dr. Sanjay Kapoor who took personal pain to constantly monitor the progress of my work. He readily extended his helping hand at times of need and gave valuable suggestions during the course of my study. I am also grateful to Prof. I. Dasgupta, Prof. J.P. Khurana, Prof. P. Khurana, Prof. A. Grower and Prof. Madan Mohan for their constant encouragement and affection. I am also thankful to Dr. S. Raghuvanshi, Dr. G.K. Panday and Dr. S. K. Agrawal for their constant support during my Ph.D. tenure.

The blessings of my parents, love of my brothers, Keshabananda and Chintamani and affection of my sister Rashmirekha strength that cannot be captured in words. At this juncture of my career I convey my gratefulness to all those who have been instrumental in fulfilling my dream.

I convey my gratitude to Dr. Manoj Sharma, Dr. Rita Sharma, Dr. Amol Solanke and Dr. Rahul Malik without whose valuable advices the completion of my thesis would have been a stride on thorns. Their expert views on molecular biology were of immense help in
planning the study. Their readiness to help, even out of the way, to facilitate scientific work is a lesson to be memorized. I extend my thanks to Dr. Prasant Dansana who stood by me in difficult times and provided immense moral support to overcome the hurdles in life.

I am grateful to my colleague Dr. Reema Mishra and Mrs. Priyanka Gupta without whose help and support this thesis would have been a distant reality. They not only helped me in execution of my experiments but also stood firmly by my side in extreme odds. Their counseling and advice during my professional lows never let me break down. Their care and concern about my lunch during my hectic experimental schedules form a part of the sweet memories of my Ph.D tenure. They not only inspired me to be an achiever but also personally assisted me in reaching my goal.

The contributions of my colleagues during my experiments are praise worthy. I am thankful to Miss Heena Kumra for her constant support and help in conducting the experiments as well as her valuable suggestions during my thesis writing.

I am also grateful to Amit, Anirvan, Gitanjali and Dr Monica for their persistent support during my Ph.D tenure. The personal bondages shared with Akhikesh, Dheeraj, Gopal, Ankur, Vinay, Poonam, Indu, Shriya, Rahul, Amarjeet, Ritu, Sweta, Alka, Ravi, Shivaji, Neekita, Balaji, Fauzia, Navonita, Rashmi, Vaishali, Pratikshya and Gourav provided strength to overcome several hurdles during the course of my studies. I extend my heartfelt thanks to Iswar, Sukanta, Niharika, Umesh, Jibesh, Prasanta, Manoranjan and Satyanarayan who consistently boosted my morale in hard times. Without friends like them, this milestone was difficult to be reached.

I am also grateful to Saboot and Akhikesh for the beautiful moments we spent and the care and affection they showered during the final days of my research. My heartfelt thanks to Neetika, Bushra, Navneen, Chandrakant, Aakanksha, Shivani, Rosetta, Santosh, Preeti, Dhruv, Ratnesh, Agini, Naini, Sushma, Malini, Mrinalini, Priyanka, Mohan and Dr. Subhankar for the friendly and cordial environment they provided in the Dept. that helped me in focusing on my goal.

I am also thankful to Dr. Nina Chaudhary, Dr. Neelam Sarkar, Renu mam and Neelam mam for their support during my Ph.D work. I am also thankful to Ashok Tiwari for his kind support. The financial help provided by CSIR, (Council of Scientific and Industrial Research), Govt. of India is duly acknowledged.
