ACKNOWLEDGEMENTS

INTRODUCTION

REVIEW OF LITERATURE

NEUROBIOLOGY OF LEARNING AND MEMORY

ANATOMY OF MEMORY

CHRONIC NEURODEGENERATIVE DISORDERS AND DEMENTIA
  Alzheimer's disease
  Parkinson's disease and dementia
  Huntington's Chorea and dementia
  Other degenerative disorders and dementia

NEUROCHEMICAL AND RECEPTOR MECHANISMS OF LEARNING AND MEMORY

CHOLINERGIC CONCEPT
  Acetylcholine synthesis markers in dementia
  Cholinergic receptor systems
  Psychopharmacology
  Lesion studies
  Cholinergic receptor modulators

GABAERGIC NEUROTRANSMISSION
  GABAAergic system : psychopharmacological studies
  Benzodiazepines : learning and memory
BZ ligands: learning, memory and cognition 44
BZ inverse agonists and antagonists: memory deficits 47
Mechanisms of BZ-induced memory deficits 48

EXCITATORY AMINO ACID SYSTEM(S) AND LEARNING, MEMORY AND COGNITIVE PROCESSES 49
NMDA receptor ionophore complex 52
Synaptic neurotransmission and NMDA receptor ionophore complex 55
NMDA receptor dysfunction and neurodegenerative dementia 59
Psychobehavioural studies 61

ADRENERGIC AND OTHER NEUROMODULATORS 64
Noradrenaline 65
Dopamine 67
Serotonin 70
Neuropeptides 71
Angiotensin converting enzyme inhibitors and memory 72

AIMS AND OBJECTIVES 75

MATERIALS AND METHODS 85

Evidence for GABA/BZ receptor modulation in short-term memory passive avoidance task paradigm in mice: GABA_A and GABA_B receptor modulation 86
Effects of dizocilpine (MK 801) and ketamine, noncompetitive NMDA receptor antagonists on short-term memory deficits in passive avoidance step-down task paradigm in mice

MK 801 produces antianxiety effect in elevated plus-maze and evidence for GABA/BZ receptor interaction with MK 801 in anxiety related behaviour in rats and mice

Effect of NMDA receptor ligands on neocortical and hippocampal EEG activity of rat brain: possible implication in learning and memory

Evaluation of learning and memory, employing elevated plus-maze in rats and mice

Reversal of scopolamine- and MK 801-induced memory deficits by angiotensin converting enzyme inhibitors in rats and mice

RESULTS

DISCUSSION

SUMMARY AND CONCLUSION
