Acknowledgements

In this auspicious moment it is the right place to devote my wills to The Almighty for initiating new thoughts and never emptied courage in all my attempts towards my research activities.

I am deeply indebted to Dr. P.Thangavel, Supervisor and Head, Department of Computer Science, University of Madras, Chennai for his ever lasting Guiding spirit all through my initiatives. His special attention towards my work always made me to work on new pointers in an efficient way of solving the problems with step by step analysis.

I also dedicate my whole hearted gratitude to Prof. Dr. K.Sarukesi, Head in Computer Science and Engineering Department, Bharathiar University, Coimbatore for laying a strong foundation for my research career.

My sincere thanks are due to University Grants Commission, Government of India for their financial support through Faculty Improvement Programme. Our beloved Secretary, College Managing Board and Principal, V.H.N.Senthikumara Nadar College, Virudhunagar for their honour to work towards my Ph.D. I thank the authorities of the University of Madras for having admitted me to the Ph.D programme and provided me the infrastructure facilities to carry out the research.

I wish to put on record the enormous debt of gratitude, I owe to my colleagues Mr.D.Christopher Durairaj, Mr.R.Palaniappan and Mr.S.Elango at V.H.N. Senthikumara Nadar College, Virudhunagar for having shared work load in the sabbatical period of my research work.

In this unique opportunity, I would like to express my sincere thanks to the
Prof. Yutaka Maeda who showed his interests on me and supplied with the reprints of some of his recent work, which gave me a better perspective on our own results. Also my appreciation goes to the Library of Indian Institute of Science, Bangalore and Indian Institute of Technology, Madras. Several anonymous referees of our research papers that were appeared in various international Journals provided me invaluable feedback concerning the convergence of our proposed technical aspects.

The thinking of moral support provided by my better reflections, Mr. N. Tamil Selvan, Mr. S. Ramesh, ASO(SG) and Mr. S. M. Kannan induces the overflow of inspiration in all my research activities. The technical support provided by Mr. M. Gopal, ATO is gratefully acknowledged.

I am especially indebted to Mr. R. Rajendra Prasath, who brought to my attention the fast heat flow as well as parallel helping hand in all respects. I wish I would never forget the company and memorable time I had from my fellow research scholars and friends Ms. D. Gladis, Mr. T. Pramananatha Perumal and Mr. T. Kumaran.

My heart is filled with affectionate gratitude to my wife Meena Rani for the inspiration and moral support she provided the long period of my research work and whose patience was tested to utmost by my erratic working hours and a long period of separation. Without her loving support and understanding, I would never have completed my present work. Particularly I owe to my sons Master Yazhisai Kumar and Master Kavin Iyal who really allowed me to do what I want and looked after themselves for all that they wanted from a father.

Most importantly, the dreams of my beloved parents about my acquiring doctoral degree may be come true from this thesis and my sincere thanks are due to them.

Chennai, India
