# TABLE OF CONTENTS

Acknowledgements .......................................................... i  
List of figures .................................................................. iii  
List of tables .................................................................... v  
List of abbreviations ....................................................... vi  
List of symbols ................................................................ vii  
Abstract ........................................................................... ix  

CHAPTER 1  
INTRODUCTION  
1.1 Preamble ........................................................................ 1  
1.2 Motivation ....................................................................... 4  
1.3 Research Objectives ....................................................... 4  
1.4 Research Methodology .................................................. 6  
1.5 Hosting Platform Model .................................................. 7  
1.6 Dissertation Roadmap .................................................... 8  
1.7 Highlights of the thesis ................................................... 12  

CHAPTER 2  
RELATED WORK  
2.1 Introduction .................................................................... 14  
2.2 Overview of Internet Services ....................................... 15  
2.3 Challenges in designing Internet services ....................... 16  
2.4 Performance Evaluation ............................................... 17  
2.5 Modeling Web applications ......................................... 18  
2.5.1 Application Characteristics ....................................... 19  
2.5.2 Workload Characteristics .......................................... 22  
2.5.2.1 Peak Load .......................................................... 24  
2.5.3 User Behavior ........................................................ 25  
2.5.4 Performance Management Strategies ....................... 26  
2.5.4.1 Metrics for Performance Evaluation ....................... 26  
2.5.4.2 Service Level Agreements ..................................... 27  
2.6 Web Authentication ..................................................... 28  
2.6.1 One Time Password (OTP) ......................................... 28
2.6.2 Short Message Service (SMS)–One Time Password (SMS-OTP)
2.6.2.1 Problems with SMS–OTP
2.6.3 Authentication using Quick Response Code (QR Code)

2.7 Summary of Findings
2.8 Conclusions

CHAPTER 3
PROPOSED BLACK BOX ANALYTICAL MODEL
3.1 Introduction
3.2 Modeling Workload
  3.2.1 Modeling Peak load
    3.2.1.1 Modeling Multiclass User Arrivals in workload
3.3 Modeling Application Characteristics
  3.3.1 Service Architecture
  3.3.2 Modeling User Behavior
  3.3.3 Modeling Session
3.4 Proposed Model (‘BBAM-I’)
  3.4.1 The Stage
3.5 Performance Evaluation
  3.5.1 Workload
  3.5.2 Metric Evaluation
  3.5.3 Simulation Results
  3.5.4 General Observations from the Logs
  3.5.5 Discussions
    3.5.5.1 Peak Load
3.6 Summary of Findings
3.7 Conclusions

CHAPTER 4
PROPOSED MODEL – ‘BBAM-II’
4.1 Introduction
4.2 Workload Characterization
4.3 Modeling Application Characteristics
  4.3.1 Service Architecture
  4.3.2 Modeling User Behavior
4.4 Proposed Model – ‘BBAM-II’
4.4.1 Service Differentiation 52
4.5 Performance Evaluation 53
4.5.1 Workload Characterization 53
4.5.2 Simulation Results 53
4.5.3 Effects of Peak loads 59
   4.5.3.1 Service Degradation 61
4.5.4 Metric Evaluation 61
4.5.5 General Observations from the Logs 62
4.5.6 Discussions 63
4.6 Summary of Findings 63
4.7 Conclusions 64

CHAPTER 5
METRIC MEASUREMENT
5.1 Introduction 66
5.2 Service Level Agreement (SLA) 66
5.3 Life cycle of Service Level Agreement 66
5.4 Structure of Service Level Agreement 68
5.5 Predicting Performance Guarantees 69
   5.5.1 Metrics and Method of Evaluation 69
5.6 Guidelines for Service Provider 72
5.7 Penalties 73
5.8 Conclusions 74

CHAPTER 6
EXPERIMENTAL RESULTS WITH E-COMMERCE WEB APPLICATION
6.1 Introduction 75
6.2 Workload characterization 75
   6.2.1 Service Architecture and User Behavior Modeling 76
6.3 Simulation with ‘BBAM-I’ 77
   6.3.1 Effect of Peak load 77
6.4 Simulation with ‘BBAM-II’ 79
   6.4.1 Effect of Peak Load 81
6.4.1.1 Effect of Increase in Average Workload

6.5 Profiling
   6.5.1 Profiling at the Second Level of Abstraction

6.6 Deriving Limits for Service Level Agreement Parameters
   6.6.1 Service Level Agreement Template

6.7 Model Evaluation

6.8 Conclusions

CHAPTER 7
REDUCING RESPONSE TIME DELAY

7.1 Introduction

7.2 Reasons for Delayed Response Time
   7.2.1 Minimizing Response Time Delay @ Home-Page
   7.2.2 Minimizing Response Time Delay @ Pay-Stage

7.3 Short Message Service –One Time Password (SMS-OTP)

7.4 Problems with SMS-OTP

7.5 Authentication using Quick Response Code (QR-Code)

7.6 Proposed Fast Authentication Scheme
   7.6.1 Registration Phase
   7.6.2 Login Phase
   7.6.3 Authentication Phase
   7.6.4 Verification of Possession of Secret-Pin and Mobile Phone
   7.6.5 Analysis of strength of the scheme

7.7 Conclusions

CHAPTER 8
CONCLUSIONS AND SCOPE FOR FUTURE WORK

8.1 Conclusions

8.2 Scope for Further Work
