1. CHANDRA VADANA, M.V. and Dastur, N. N.

Bile pigments have been shown to be normal constituents of buffalo milk. Biliverdin (green) is secreted in milk and later converted under the influence of microorganisms to bilirubin (yellow).

2. CHANDRA VADANA, M.V. and Daniel, E.V.

A rapid and a simple method of biliverdin estimation in buffalo milk with good reproducibility and recovery has been standardised.
