2. Milk clotting enzymes. ...... 44
## CONTENTS (Contd...)

3. Cheese making. .................................................. 45
4. Analysis of cheese whey. .................................. 46
5. Analysis of cheese. .......................................... 47

### RESULTS

**I. Purification of bacterial milk clotting enzyme.**

1. Specific activity of crude enzyme. .......................... 50
2. Separation through Sephadex G-25. .......................... 50
3. Gel filtration through Sephadex G-100. ....................... 53
4. DEAE-Sephadex A-50 column chromatography. .............. 53
5. Ratio of clotting activity to proteolytic activity. ....... 53

**II. Determination of the homogeneity of bacterial milk clotting enzyme.**

1. SDS polyacrylamide disc electrophoresis. .................. 55
2. Ultracentrifugal analysis. .................................... 55
3. Isoelectric focusing of bacterial milk clotting enzyme. .... 55
4. Ultraviolet absorption spectrum. ............................ 55

**III. Properties of purified bacterial milk clotting enzyme.**

1. Effect of milk pH. ........................................... 56
2. Stability to pH. ............................................. 56
3. Effect of temperature. ....................................... 56
4. Effect of heat stability. ..................................... 56
5. Effect of storage. ........................................... 57
6. Effect of enzyme concentration. ............................. 57
7. Michaelis-Menten constant. .................................. 57
CONTINUED (Contd...)  

8. Effect of CaCl₂ concentration in milk.  .  .  59  
9. Effect of metal ions and salts.  .  .  .  59  
10. Effect of various chemical reagents.  .  .  59  
11. Molecular weight of enzyme.  .  .  .  60  
12. Amino acid analysis.  .  .  .  .  63  
13. Action of purified bacterial milk clotting enzyme on casein and its fractions.  .  .  63  

IV. Use of bacterial milk clotting enzyme for preparation of Cheddar cheese.  .  .  63  
1. Changes during manufacture.  .  .  .  63  
2. Changes during ripening.  .  .  .  63  

DISCUSSION  .  .  73 - 95  
I. Purification of milk clotting enzyme.  .  .  73  
II. Homogeneity of milk clotting enzyme.  .  .  79  
III. Properties of purified \textit{B. subtilis} K-28 milk clotting enzyme.  .  .  80  
IV. Changes during cheese manufacture.  .  .  88  
V. Changes during cheese ripening.  .  .  .  90  

SUMMARY  .  .  96 - 100  

BIBLIOGRAPHY  .  .  101 - 118
