1. Purification procedures for *Bacillus subtilis* K-26 milk clotting enzyme  
   ** 51
2. Fractional precipitation of *B. subtilis* K-26 milk clotting enzyme using acetone.  
   ** 52
3. Ratio of milk clotting activity to proteolytic activity at different stages of purification of *B. subtilis* K-26 milk clotting enzyme  
   ** 54
   ** 58
5. Effect of some metal ions and salts on the residual activity of *B. subtilis* K-26 milk clotting enzyme.  
   ** 60
6. Effect of various chemical reagents on the residual activity of *B. subtilis* K-26 milk clotting enzyme.  
   ** 61
7. Amino acid analysis of *B. subtilis* K-26 milk clotting enzyme.  
   ** 64
8. Action of *B. subtilis* K-26 milk clotting enzyme on degradation of casein and fractions of casein.  
   ** 65
   ** 67
10. The effect of five different enzyme systems on moisture content during ripening of Cheddar cheese.  
    ** 69
11. Effect of five different enzyme systems on pH during ripening of Cheddar cheese.  
    ** 71
12. Effect of five different enzyme systems on total nitrogen content during ripening of Cheddar cheese. .... 72

13. Effect of five different enzyme systems on soluble nitrogen during ripening of Cheddar cheese. .... 73

14. Effect of five different enzyme systems on maturity index during ripening of Cheddar cheese. .... 75

15. Effect of five different enzyme systems on organoleptic evaluation of Cheddar cheese ripened for six months. .... 77
