CONTENTS

ACKNOWLEDGEMENTS i

INTRODUCTION 1 – 10

REVIEW OF LITERATURE 11 – 90

FUNCTIONAL ANATOMY OF PERIPHERAL SENSORY NERVES 13

NOCICEPTIVE PAIN 14
- Nociceptors and Inflammation 14
- Mechanisms of Nociceptive Pain 15
  - Peripheral sensitization 16
  - Central sensitization 18

NEUROPATHIC PAIN 20
- Classification of Neuropathic Pain 22
- Animal Models of Neuropathic Pain 23
- Mechanisms of Neuropathic Pain 28
  - Peripheral mechanisms 30
  - Central mechanisms 40

ARACHIDONIC ACID-CYCLOOXYGENASE-PROSTAGLANDIN PATHWAY IN NOCICEPTION 49
- Prostaglandin Synthesis 50
- Cyclooxygenase Isozymes 52
- Physiological and pathological roles of cyclooxygenase 56
- Prostaglandins as Nociceptor Sensitizers 60
- Mechanisms of Prostaglandin-Mediated Hyperalgesia and Allodynia 61
  - Peripheral sensitization 61
  - Central sensitization 63
- Non-Steroidal Anti-Inflammatory Drugs as Synthetic Cyclooxygenase Inhibitors 65
- Effects of Cyclooxygenase Inhibitors on Nociception 72

NEUROIMMUNE AND NON-NEURONAL CELLS ACTIVATION IN NOCICEPTION 80
- Neuroimmune Activation and Nociception 80
- Non-Neuronal Cells Activation and Nociception 83

AIMS AND PLAN OF WORK 91 – 94
CHAPTER 1: PHARMACOLOGICAL PROFILE OF PARECOXIB: A NOVEL, POTENT INJECTABLE SELECTIVE CYCLOOXYGENASE-2 INHIBITOR

1.1. Introduction
1.2. Material and methods
1.3. Results
1.4. Discussion

CHAPTER 2: LIPOPOLYSACCHARIDE-INDUCED HYPERSENSITIVITY: ROLE OF CYCLOOXYGENASE-2

2.1. Selective Inhibition of Cyclooxygenase-2 Reverses Lipopolysaccharide-Induced Hyperalgesia
2.1.1. Introduction
2.1.2. Material and methods
2.1.3. Results
2.1.4. Discussion

2.2. Lipopolysaccharide Enhances Formalin-Induced Nociception: Role of Cyclooxygenase-2
2.2.1. Introduction
2.2.2. Material and methods
2.2.3. Results
2.2.4. Discussion

CHAPTER 3: ROLE OF CYCLOOXYGENASE ISOFORMS ON THE DEVELOPMENT AND MAINTENANCE OF HYPERSENSITIVITY IN MONONEUROPATHIC RATS

3.1. Selective Inhibition of Cyclooxygenase-1 Attenuates the Development of Neuropathic Pain in Nerve-Injured Rats
3.1.1. Introduction
3.1.2. Material and methods
3.1.3. Results
3.1.4. Discussion

3.2. Selective Inhibition of Cyclooxygenase-2 Alleviates Hypersensitivity in Neuropathic Rats
3.2.1. Introduction
3.2.2. Material and methods
3.2.3. Results
3.2.4. Discussion

CHAPTER 4: ROLE OF CYCLOOXYGENASE ISOFORMS ON HYPERSENSITIVITY IN SPARED NERVE INJURY: AN ANIMAL MODEL OF NEUROPATHIC PAIN

4.1. Introduction
4.2. Material and methods
