# TABLE OF CONTENTS

Acknowledgement

Declaration

Chapter:

I. Introduction 1-24

1.1 General Introduction

1.1.1. Introduction to Cachar District

1.1.2. Introduction to Karimganj District

1.1.3. Introduction to Hailakandi District

1.1.4. Introduction to N.C.Hills

1.1.5. Introduction to Mizoram

1.1.6. Introduction to Manipur

1.1.7. Introduction to Meghalaya

1.1.8. Introduction to Tripura

1.1.9. Objective

1.1.10. Survey of Literature

II. Methodology 25-46

2.1. The History of operation Research

2.2. Model and Modelling in Operation Research

2.3. Advantages of Models

2.4. Application and Scope of Operation Research

2.5. General Structure of Linear Programming Model

2.6. Assumptions of Linear Programming Problem
2.7. General Mathematical Model of LPP
2.8. Simplex Algorithm
2.9. Artificial Variable Technique
2.10. Two-Phase Simplex Method
2.11. Post Optimal Analysis of LP Model
2.12. Change in Cost Vector
2.13. Change in the Requirement Vector
2.14. Introduction to Replacement Problem
2.15. Replacement of an item deteriorate with time
2.16. Introduction to Inventory control
2.17. Inventory Decisions
2.18. Inventory Terminology
2.19. Introduction to Linear Transportation Problem
2.20. Solution of Transportation Problem
2.21. To find Initial Basic Feasible Solution
2.22. Optimality Test

III. Data Collection 47-72
IV. Modelling of Transportation Related Problems of South Assam 73-114
V. Post Optimal Analysis 115-141
VI. Modelling for Inventory and Transportation of Some Goods 142-155
Conclusion 156-158
References 159-163
