Acknowledgements

A journey is easier when you travel together. Interdependence is certainly valuable than independence. During my research work, I have been accompanied and supported by many people. It is a pleasant aspect that I now have the opportunity to acknowledge with sincere respect, my deep sense of gratitude to all those who have been instrumental in bringing this thesis to completion.

It is my profound privilege to express sense of indebtedness to my venerable supervisor, Dr. Harinder Pal Singh, Chairperson, Department of Environment Studies, Panjab University, Chandigarh, who guided me day and day out to ocean of knowledge from world of ignorance. His perceptive suggestions and invaluable guidance were very exciting and encouraging for me. It has been a matter of pride and profound pleasure to have worked under his kind and able supervision. Without his generous assistance and encouragement this work would have not been materialized.

I want to express my intense appreciation to my co-supervisor, Prof. R.K. Kohli, Vice Chancellor, DAV University, Jalandhar. His helpful suggestions and productive condemnation have been influential in providing me the essential momentum to endeavour for gaining valuable logical skills.

I also feel immense pleasure to thank co-supervisor, Prof. Daisy R. Batish, Department of Botany, Panjab University, Chandigarh, for their valuable comments and kind help during the course of my Ph.D. Their in-depth knowledge has always helped me mainly for many invigorating and informative conversations.

I feel pleasure to thank Dr. V. P. Sharma, Senior Scientific Officer, Department of Zoology, Panjab University, Chandigarh, for rendering his ever ready professional help to me. I am also grateful to Dr. P. C. Narg and his group SAIFF, AIIMS, New Delhi, for necessary help in getting my samples analysed by TEM.

I thank all the clerical, laboratory, library and Technical staff of the department, especially Mr. Rajender, Mr. Jagdish, Mr. Lalit, Mr. Rajender Dahiya, Mr. Suresh, and Mr. Ajay for their ever available help. My indebtedness also extends to Mr. Laluan Prasad, Mr. Ram Narayan and Mr. Sandeep for their help and cooperation during the entire course of study.

I would like to express my warm thanks to my seniors Shalender di, Gurpreet di, Savita di, Nadia di, Nalini di and Nitina di for their guidance and help. I owe my special thanks to Shalender di and Gurpreet di for their unconditional help and kind suggestions. The help extended by them is truly praise worthy.
A positive energy and humorous environment is all we need to accomplish such an arduous task. I have really appreciated the everyday company from my seniors and fellow PhD students. Thanks to all my friends especially Priyanka, Kiran, Swarabhi, Anjana, Anu, Anita, Aditi, Sangeeta, Gunjan, Prabha, Saroj, Sangeeta and Gauri for being part of all those long discussions (scientific and non-scientific). I really thank them for making every day lunch a special treat. I will really cherish those memories. I would also like to acknowledge Neekeg Sir, Sartaj Sir, Arvind, Harman and Gaganprat for their help and encouragement. I would like to extend my heartfelt gratitude to Anju, Shikha, Neha, Simran and Ruchi for their unwavering support and encouragement and cheering me up with their kindly meant witticisms.

Words are insufficient to verbalize my deep sense of gratitude and regards to my Mummy, Bade Papa and Papa, who soulfully provided me their constant support and the right impetus to undertake the challenge of this proportion like all other spheres of life, for what I cannot measure but treasure. I never had any fear, that I would be letting them down or not living up to some pre-determined standards. I owe my PhD to them than to anyone else. My special thanks to my loving sister Rajeshwar Negi, brother-in-law Mr. Rajkumar Negi, sister-in-law Anita Negi, brothers Deshraj Negi, Sunil Negi and Jiwan Negi for rejuvenating my fainting spirits in testing times and providing me inner strength.

I feel an immense pleasure to thank my Parent-in-laws, Sh. R.B Khojan and Smt. Chuttu Khojan, for their belief and showing patience during this whole period. I would like to extend my heartfelt gratitude to Sh. P.S Khojan and Smt. Jamna Khojan for their continuous and unconditional support. My gratitude is due to Mr. Shiva Khojan and Mrs. Shanta Khojan for keeping me away from family affairs, so that I could accomplish this manuscript soon. I owe my gratitude to Shiv Bhagti, Priyanka and Nitin Khojan for their affection and care. Enchanting with them always boosted up my enthusiasm and relieved me from work pressure. To them I owe my wonderful today and dream filled future.

Words are too inapt to express my sincere gratitude to my husband Mr. Kapil Khojan for his love, support, motivation, and never ending enthusiasm. He kept me away from his problems and was always ready to solve my problems. He has been my biggest critic and appreciator. When my morals ebbed and enthusiasm waned, it was he who helped me getting out of it, a feat that can never be paid back in feelings or words. I would like to sum it up with reference to Aryan, Angel, Priyancy and Shorya, my little sweet angels, who always carried me to their fairy world and relieved me from my stresses and strains. They acted as a real BIOCATALYST for joyful execution of such a tedious task.
Last but not least, I would like to pen down my deepest sense of indebtedness to my cousin late Prof. Hans Raj Negi who left the footprints for me to follow.

I sincerely acknowledge University Grants Commission (UGC), New Delhi for the financial assistance during my Ph.D.

Above all, I thank the Almighty whose blessings enabled me to ascend another step of my destination by accomplishing this piece of work.
