ACKNOWLEDGEMENT

I wish to express my deep appreciation to Prof. A.R. Prasanna for his enthusiasm, competent guidance and encouragement which have contributed immensely to the studies presented here. It is indeed a great pleasure to have worked with him. I thank him very much.

I express my thanks to the University Grants Commission for the award of the Teacher Fellowship under the Faculty Improvement Programme and the Director, Physical Research Laboratory for the hospitality which enabled me to carry out the investigations at PRL.

My sincere thanks are due to Professors C.V. Vishweshwara, J.V. Narlikar V.L. Ginzburg, R.K. Thakur, R.K. Varma, R. Pratap and K.H. Bhatt for many fruitful discussions which have contributed to the thesis. It is a pleasure to thank Dr. K.S. Rao for the discussions regarding computer programmes.

I have been benefitted by the healthy discussions with my colleagues Manab, Avinash, Ashok, Harish and Rama. I thank them very much. I thank Ashwin, Ashwini, Rajesh, Ramesh, Surendra, Sushil, Shefali for creating a home like atmosphere away from my home.
Thanks are also due to Mr. P.S. Shah and the staff, PRL Computer Centre, for a smooth flow of the outputs, and to Swadha, PRL Library, Bhavsar and Vora for preparing the diagrams.

I am indebted to my mother and father and specially to my wife Maya and daughter, Buna, for bearing with all kinds of hardships during my long period of absence from home. Without their cooperation and forebearance, it would not have been possible for me to carry out this investigation.

My friends Sukumar, Gagan, Nasir, Narendra and Gopal were very much helpful to me during my absence from my home and also during the writing of my thesis. I thank them very much.

I thank Mr. V.T. Viswanathan, Mr. R.R. Singh and Mr. B.R. Soni for carrying out the tasks of the typing and cyclostyling of the manuscript.

Lastly, thanks to everybody who helped me directly or indirectly, academically or otherwise, in producing this thesis.

7th July 1982

D.K. Chakraborty
