ACKNOWLEDGEMENT

I owe a never ending debt of gratitude to Almighty God for his grace and blessings in the successful completion of this research and thesis. I shall like to pen down my gratitude for all those who directly or indirectly helped me in completion of this work.

I would like to seize this opportunity to record my intense sense of gratitude towards my supervisor, Dr. (Mrs.) Vinti Davar, Associate Professor Department of Home Science, K.U.K., whose scholarly guidance and very judicious and intelligent suggestions have enabled me to accomplish this very demanding task. Her enlightened storehouse of vast knowledge and farsightedness eased my way to complete this challenging task. Without her sincere and consistent guidance, I would never have been able to complete this thesis successfully.

My earnest and deepest gratitude to Dr. Surinder Sahay, owner of Sahay’s clinic for rendering his services and cooperation which made the achievement of the objectives of this study feasible. Without his help this thesis would have been a dream hard to realize. I am thankful to his entire staff for helping me in collection of data and analysis of blood samples of my subjects.

It is a pleasure for me to acknowledge the support, constructive suggestions and extensive help provided by Dr. Raghuvender Tanvar, Professor, Department of History, Dr. Sharda Gupta, Ex Dean Life Sciences, Dr. R.K. Sharma, Professor, Department of Zoology, Prof. C.R. Darolia, Chairperson, Department of Psychology, Dr. Tarvinder Jeet Kaur, Assistant Professor, Department of Home Science and Late. Dr. Leela Yadav, Professor, Department of Political Science for my research work.

One is not able to complete any project without the congenial and conducive atmosphere from all quarters. I express immense thanks to all teaching and non teaching staff of the Department of Home Science,
K.U.K. who overtly were instrumental in facilitating the completion of this work. Sincere thanks are owed to the staff of ‘Soil testing lab’ of Karnal for providing facilities for completion of this research work.

I shall be failing in my duty if I do not thank all my subjects who volunteered to be part of my research. Moreover, I would like to thank their family members who spared their precious time and listen carefully whatever has been told to them.

It is beyond my access to acknowledge in words my gratitude to all my family members with whose sacrifices love and blessings, I have reached this stage of my life. Words can hardly express the profound sense of gratitude I owe to my in-laws Mr. Kulwant Saini and Mrs. Sharda Devi, nani Mrs. Kamla Saini, mother Mrs. Rita Saini, mama Mr. Kuldeep Saini and mami Mrs. Suneeta Saini for their blessings and boosting my moral. I am also thankful to my sister Mrs. Monika Saini, jija ji Mr. Sanjay Saini, brother Kapil, who invariably kept my high spirits and provided great motivation to me.

Words fail in conveying my deep sense of gratitude to my husband Mr. Jitendra Singh Saini for sacrificing his comforts and interests so as to ensure my long hours of concentration at my research work and for standing by me throughout this ordeal. Completion of this task would not have been possible without the loving support of my daughter Kriti and son Chandershekhar who had to bear the burnt of my preoccupation with research work at the most critical period of their life.

I specially acknowledge sense of indebtedness to Mr. Ajay Gupta for the technical help and who took great pains in typing this thesis in a flawless manner with a sense of meticulous accuracy to the best of his capacity.

(Shweta Saini)
