List of Tables

Table 3.1: β-convergence in per capita real income: 1960-98 ......................................... 53
Table 3.2: NLS estimate of β-convergence in PCI at 1993-94 prices: 1960-98 .................. 55
Table 3.3: NLS estimate of β-convergence in PCI at 1980-81 prices: 1960-97 ............. 56
Table 3.4: β-convergence in per capita primary sector: 1960-98 .................................. 57
Table 3.5: β-convergence in per capita secondary sector: 1960-98 .............................. 58
Table 3.6: β-convergence in per capita tertiary sector: 1960-98 .................................. 60
Table 3.7: β-convergence estimate for per capita real income from 1960-98 ............... 62
Table 3.8: β-convergence estimate for per capita primary sector ............................... 64
Table 3.9: β-convergence estimate for per capita secondary sector .............................. 65
Table 3.10: β-convergence estimate for per capita tertiary sector ................................. 66
Table 3.11: β-convergence in per capita real income across 14 states: 1960-97 .......... 68
Table 3.12: Measures of income inequality: 1960-97 .................................................. 71
Table 3.13 Trends in variance of per capita real income: 1960-97 ............................... 73
Table 3.14: Data sources, adjustment and limitations .................................................. 76
Table 3.15: Unconditional convergence: 1981-2000 ................................................... 78
Table 3.16: Test for conditional convergence .............................................................. 80
Table 3.17: Variables, data sources, adjustment and limitations ................................... 81
Table 3.18: Conditional convergence in income across 14 states: 1981-2000 ............. 84
Table 3.19: Further results on conditional convergence in income across 14 states: 1981-2000 .......................................................... 85
Table 3.20: Further results on conditional convergence with human capital variable: 1981-2000 .......................................................... 87
Table 4.1: Data sources and variables description .......................................................... 95
Table 4.2: β-convergence in per capita consumption expenditure .............................. 97
Table 4.3: β-convergence in inequality adjusted per capita consumption expenditure 97
Table 4.4: β-convergence in inflation and inequality adjusted per capita consumption expenditure .......................................................... 98
Table 4.5: β-convergence in per capita income: 1983–1999-00 .................................. 100
Table 4.6: Evidence of convergence/divergence between time points ...................... 102
Table 4.7: Consumption inequality across 14 major states ....................................... 103
Table 4.8: Relation between β and σ-convergence (divergence) in inflation and inequality adjusted per capita consumption expenditure .......................................................... 104
Table 5.1: Variables, data sources, adjustment and limitations .................................. 108
Table 5.2: Percent share of explicit transfers in revenue receipts ............................... 112
Table 5.3: Percent share of explicit transfers in revenue expenditure ......................... 113
Table 5.4: Percent share of explicit transfers in total expenditure .............................. 114
Table 5.5: Percent share of explicit transfers in state income .................................. 115
Table 5.6: Percent share of implicit transfers in revenue receipts .............................. 116
Table 5.7: Percent share of implicit transfers in revenue expenditure ....................... 117
Table 5.8: Percent share of implicit transfers in total expenditure ......................... 118
Table 5.9: Percent of implicit to explicit transfers ................................................. 119
Table 5.10: Percent share of total transfers in revenue receipts ............................. 120
Table 5.11: Percent share of total transfers in revenue expenditure ......................... 121
Table 5.12: Percent share of total transfers in total expenditure .......................... 122
Table 5.13: Inter-state percent distribution of population: 1976-77 to 2000-01 ........ 123
Table 5.14: Percent distribution of population, state income, total transfers, and total expenditure across the groups of states: 1976-77 to 2000-01 .......................... 123
Table 5.15: Per capita explicit transfers (Rs. at constant prices) ............................... 124
