Acknowledgement

This endeavor would not have been possible had it not been FOR the guidance, support and blessings of a lot of people. The completion of this document seems to be the most opportune time for me to thank all these people some of whom have had a very deep impact in my life.

First and foremost I would like to thank my guide Dr. Ranju Bansal, Senior Lecturer in Pharmaceutical Chemistry, Panjab University, whose ever-present force helped me mature as a researcher and bring this thesis to completion from the formative stages to the final draft. Her diligence and patience helped me overcome many road blocks during the course of the research.

I would also like to register my sincere thanks towards late Prof. A.K. Singla (Ex-chairperson) and Dr. T.R. Bhardwaj, Professor and Chairperson, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh, for providing me with all the facilities needed to complete this manuscript.

The whole process and task would not have started had it not been for the inspiration, guidance and encouragement of my revered teacher, Late Prof. D.P. Jindal. I feel honoured to having been granted the opportunity to be associated with him although for a time period that was too short for me to absorb and enjoy his unique and exceptional persona. His inspiration and words still guide me in my pursuits. I greatly appreciate his family for motivating me to carry further the work qualitatively.

With great pleasure and reverence, I express my debt of profound gratitude to all my teachers especially Prof. S.K. Kulkarni, Prof. V.K. Kapoor, Prof. P.D. Sharma and Dr. Poonam Piplani, for their moral support for sharing with me their pearls of wisdom to realize my goal.

I am thankful to Prof. Allen Harvey, Director, Strathclyde Institute for Drug Research (SIDR), University of Strathclyde, Glasgow, United Kingdom for carrying out the pharmacological evaluation of the newly synthesized compounds.
Thanks are also due to him for providing facilities to Dr. Ranju Bansal, for performing adenosine binding assays at SIVDR, U.K.

Financial support provided by Haryana State Council for Science and Technology is gratefully acknowledged. I would be failing in my duty if I do not thank Astra IDL, Bangalore for the generous gift sample of Theophylline used in the work.

I express my gratitude towards the technical support provided by Mr. Avtar Singh, Mr. Jagtar Singh, Ms. Ranjeet Kaur, Mr. Dhruv Dev, Mr. Ravinder Kumar, Mr. Kishori Lal, Mr. Shrawan and Mr. P.D. Chaudhary (Librarian) for their help during the course of my work.

My colleagues Dinesh, Gaurav, Priyanka, Ruchi, Sheetal and friends especially Amit, Amita, Ashwani, Naveen and Neeraj are next in line that deserves my appreciation and gratitude for their cooperation and camaraderie.

I would also like to mention my gratitude towards the persistence and patience of my dearest parents whose hard work and endurance motivated me to carry my work to completion. The chain of gratitude would be incomplete without the mention of my sisters Benu, Veena, Bindu and Anju whose furtherance and affection has bailed me out of many a tough moments. I must give immense thanks to Teenu who is a strong support for me in all tough times and the most groovy shade in which I have lived the most memorable moments of my life.

Lastly I want to thank the ever benevolent Lord for having bestowed upon me his blessings and giving me the strength and wisdom to pursue my goals.
