ACKNOWLEDGEMENTS

I would like to gratefully acknowledge the advice and guidance of my advisor, Dr. Nikhil K. Kothurkar, who always encouraged me to work hard during the period of the work. I would also like to express my appreciation for the suggestions provided by the doctoral committee convenor Dr. Duraisamy Kumaresen and member Dr. R. Yamuna. With heartfelt sorrow, I extend my sincere gratitude to my former convenor, the late Dr. S.S. Bhagawan, who always encouraged and follow up my research progress. His death is a great loss to the young researchers in the field of polymer chemistry.

I would like to extend my gratitude to Dr. Sriram Devanathan and Dr. Duraisamy Kumaresan who have contributed their expertise to this work. I also thank Dr. Murali Rangarajan and, Dr. R. Yamuna and Dr. T. G. Satheesh Babu for allowing me to use different analytical instruments owned in their lab. I am also thankful to Prof. R. Subba Rao, Chairman, Dept. of Chemical Engineering and Material Science, Amrita School of Engineering.

I also thank different institutions such as Indian Institute of Technology Madras, PSG Institute of Technology Coimbatore, Sophisticated Analytical Instrumental Facility at CUSAT and various other academic institutions for the characterization of the samples. I am also thankful to the reader. Dr. Anandan from the Department of Electronics, Cochin University of Science and Technology (CUSAT) for allowing me to carry out EMI shielding/microwave absorption analyses of different samples. I thank Dr. Meera B. Sasikumar for her valuable inputs for doing the statistical design of experiments. I also thank Mr. Mahadevan and his project group of Mechanical Engineering department for helping me to prepare the laminates using wet lay up vacuum bagging method. I am thankful to Mr. Mohan Raj for his support and suggestions for carrying out dye sensitized solar cell studies. I also thank all academic and technical staffs of the Departments of Chemical Engineering and Materials Science, Sciences and Mechanical Engineering for their advice and assistance during the period of my study.

The financial support from Defense Research Development Organization (DRDO) is earnestly and greatly acknowledged. I also thank the Jawaharlal Nehru Memorial Scholarship for doctoral studies for the fellowships.
I appreciate the friendship and support of the many people who had helped me while I was doing my research work. I thankfully acknowledge Ramakrishnan, Senthil kumar, Baladhandapani, Rajamani, Keerthy Dhara, Sreeja Prahlad and all other research scholars in the Materials Chemistry Research Lab for their loving support and help.

I would like to express the utmost thanks to my dear parents Mr. E. C. Johny & Mrs. Emily Johny, my dear husband Mr. Priswin Jose, my sweet little baby Ryan and my family members for their faithful love and support throughout the entire period of my studies. Finally but most importantly, I thank the Almighty for blessing me with health and resources for performing at my best all through these years.

Jelmy E.J
