Acknowledgements

I am extremely grateful to God Almighty and Amma for bestowing upon me this wonderful opportunity and for giving me the strength to successfully complete PhD work. First, I would like to express my sincere gratitude to my advisor Dr. Raja Biswas for his continuous guidance, patience and motivation throughout the study. There are not enough words to thank him. I am immensely thankful to Indian Council of Medical Research, India for awarding me with Senior Research Fellowship (45/16/2011/IMM-BMS) for research and to Department of Biotechnology, India for supporting the project (BT/PR13125/GBD/27/193/2009) that I worked on. It is truly a blessing that I got this wonderful opportunity to be supported by these two prestigious organizations of my beloved country. My heart bows before Dr. Shantikumar V Nair, Dean of Research, Director, Amrita Center for Nanosciences and Molecular Medicine. His words of wisdom and his immense devotion towards research filled me with positive energy and the reassurance that no effort goes in vain. I would like to thank the rest of my thesis committee: Dr. Anil Kumar V., Dr. Kavitha Dinesh, Dr. Ullas Mony, Dr. Bindu Paul, Dr. Lakshmi Sumitra V., Dr. Vinoth Lakshmanan for their insightful comments and questions which incented me to widen my perspective. My sincere thanks also goes to Dr. AKK Unni, Dr. Reshmi T, Dr. Giridharan, Sunil, Sajith, and all other Central Animal Facility staff who helped me conduct the animal studies that was a part of my thesis. Without their valuable support it would not be possible to conduct this work. I will always remember the efforts put by Ms Girija Natarajan and Ms Sreeshma MS. for their support and in making doctoral committees and other official matters a smooth sail. I am grateful to Dr. Bipin Nair, Dean, School of Biotechnology, for his support and encouragement that continued even after I completed my Master’s degree at Amrita School of Biotechnology, Kollam. I am thankful to Dr. Lalitha Biswas for making science educational and entertaining at the same time. It is with great joy that I remember my incredible lab mates, Ms Sukhithasri V, Mr Vivek Vinod, Ms Nandana Somanathan, Ms Maitrayee Chatterjee and Ms Maneesha Suresh for all the research and fun we shared. It saddens me a little when I realize that it is time to move on. I would like to thank each and every one who helped me during my work. A loving family is the backbone of success. I would like to thank my family: my mother, KC Usha and father, Late NNK Nair (who wanted to see me as a Doctor), and my brother Shijith N for always being there. I also feel wonderful to have the support and blessings of my grandparents. I express my gratitude to my in-laws, Mr. Siva Prasadan Nair, Ms. Balamoniamma, Mr. Kailas Prasad who always supported my ambition. All this wouldn’t have been possible if not for the understanding and support of my loving husband, Mr. Vipin Prasad-Siva.
