

LIST OF TABLES

| Table No. | Particulars | Page No. |
|------------------|--|-----------------|
| 1 | Composition of ricebran lecithin | 3 |
| 2 | Composition of soy lecithin | 3 |
| 3 | Composition of Egg lecithin | 4 |
| 4 | Phospholipids and their use | 6 |
| 5 | Properties of a gas, Supercritical fluid and liquid | 9 |
| 6 | Physical constants of some inorganic compounds used as supercritical fluids | 12 |
| 7 | Examples of Reactive Oxygen species and their characteristics | 16 |
| 8 | Distribution of cholesterol in man | 27 |
| 9 | Levels of variables chosen for the solubility studies | 40 |
| 10 | Box Behnken design of experiments with three independent variables | 40 |
| 11 | Levels of variables chosen for the phosphatidyl choline enrichment study | 44 |
| 12 | Box Behnken design of experiments with three independent Variables | 45 |
| 13 | Composition of ricebran lecithin (present study) | 50 |
| 14 | Experimentally determined values of solubility of total lipids | 55 |
| 15 | Coefficients of the response function to predict total lipids solubility and statistical analysis | 55 |

| | | |
|----|---|----|
| 16 | Solubility of lipid fractions | 61 |
| 17 | Chemical characteristics of carbon dioxide extracted lecithin (CDEL) and alcohol soluble lecithin (ASL) | 64 |
| 18 | Individual phospholipid contents in CDEL, alcohol soluble (ASL) and alcohol insoluble lecithin | 67 |
| 19 | Comparison of phosphatidyl choline enrichment in the present study to that reported in literature | 69 |
| 20 | Percentage composition of fatty acids in lipids from ricebran lecithin | 71 |
| 21 | Experimentally determined and predicted values of Phosphatidyl choline enrichment | 73 |
| 22 | Coefficients of the response function to predicted phosphatidyl choline enrichment | 77 |
| 23 | Percentage composition of fatty acids in lipids from soy, egg and ricebran phosphatidyl choline | 88 |
