Table of Contents

CHAPTER 1 ........................................................................................................13

1.1 EDUCATION OF CHILDREN WITH SPECIAL NEEDS..............................14

1.1.1 Background .............................................................................................14

1.1.1.1 Importance of Primary School Education ..........................................14
1.1.1.2 Definition of disability and Special Educational Needs (SEN) ..........19
1.1.1.3 Educational provisions for children with special needs ....................22

1.1.2 Mainstreaming - Integrated Education and Inclusive Education ............29

1.1.2.1 Integrated Education ..........................................................................31
1.1.2.2 Inclusive Education ...........................................................................37

1.1.3 Education of Children with Visual Handicap .........................................45

1.2 DEVELOPMENT OF ARITHMETIC SKILLS ........................................53

1.2.1 Importance of Arithmetic Skills at Primary School Level .......................56

1.2.2 Development of Arithmetic Skills among Children with Visual Handicap ....65

1.2.2.1 Curriculum ..........................................................................................68
1.2.2.2 Learning Process .................................................................................71
    A. Learning experiences ................................................................................71
    B. Mathematical understanding ....................................................................75
1.2.2.3 Learning Resources ............................................................................76
    A. Braille ......................................................................................................77
    B. Abacus ....................................................................................................82
    C. Taylor Frame ...........................................................................................83
    D. Nemeth Code ..........................................................................................85
    E. Other assistive aids and technology .......................................................85
1.2.2.4 Assessment of learning .....................................................................88

1.2.3 Evaluation of Arithmetic Performance – Role of Diagnostic Approach ....89

1.3 LEARNING AND COGNITION – PIAGET’S THEORY OF COGNITIVE DEVELOPMENT .................................................................94

1.3.1 Piaget’s Stages of Cognitive Development ............................................101

    A. Sensory Motor Period (0 to 2 years) .......................................................102
    B. Pre-operational Period (2 years to 7/8 years) .........................................103
    C. Concrete-Operational Period (7/8 years to 11/12 years) .......................104
    D. Formal Operations (after 11/12 years of age) .......................................105

1.3.2 Significance of Piaget’s Stages of Cognitive Development - General ......106

1.3.3 Significance of Piaget’s Theory for Cognitive Development - Children with Visual Handicap ...............................................................112

1.3.4 Significance of Piaget’s Theory for Development of Arithmetic Skills ....117

1.4 CONTEXT OF THE STUDY.........................................................................122
CHAPTER 2 ........................................................................................................... 124

2.1 STUDIES ON EDUCATION OF CHILDREN WITH VISUAL HANDICAP .......... 125

2.1.1 Studies on language comprehension ...................................................... 128

2.1.2 Studies on Braille reading ..................................................................... 131

2.1.3 Studies on Mathematics education ...................................................... 141

2.1.4 Studies on assessment of learning ....................................................... 148

2.2 STUDIES ON DEVELOPMENT OF ARITHMETIC SKILLS ..................... 151

2.2.1 Studies on development of arithmetic abilities .................................. 151

2.2.2 Studies on cognitive arithmetic .......................................................... 159

2.2.3 Studies on gender differences in relation to achievement of arithmetic skills 173

2.2.4 Studies on Teaching-Learning in Mathematics .................................... 184

2.2.5 Studies on Assessment in Mathematics .............................................. 189

  2.2.5.1 Studies on diagnostic evaluation of performance in Arithmetic Skills . 189
      A. Learning Models.................................................................................. 195
      B. Error categorization......................................................................... 205
  2.2.5.2 Studies on diagnostic evaluation in Indian context ....................... 213

2.3 STUDIES ON PIAGET’S STAGES FOR COGNITIVE DEVELOPMENT ....... 214

2.3.1 Studies on cognitive capabilities – General ...................................... 215

2.3.2 Studies on cognitive capabilities – Children with Visual Handicap ...... 218

2.3.3 Studies on Piaget’s cognitive development stages in relation to development of mathematical skills ................................................................. 221

  2.3.3.1 Studies of Piagetian tasks in relation to development of number concept -
          General ......................................................................................... 227
  2.3.3.2 Studies of Piagetian tasks in relation to development of number concept –
          Children with Visual Handicap ...................................................... 233

2.4 STUDIES ON INCLUSIVE EDUCATION .................................................. 240

2.4.1 Inclusive education – studies on general practice ............................ 240

2.4.2 Teacher preparation and attitude towards inclusive education .......... 243

2.4.3 Approaches to inclusive educational practices ................................. 247

2.4.4 Inclusive education for Children with Visual Handicap ................... 251

2.5 SUMMARISING THE SIGNIFICANCE OF THE STUDY IN RELATION TO THE LITERATURE REVIEWED ......................... 253

2.6 JUSTIFICATION OF THE STUDY ......................................................... 265
CHAPTER 3 ..........................................................268
3.1 NATURE, PURPOSE AND SCOPE OF THE STUDY .................268
3.2 OBJECTIVES OF THE STUDY ..........................................................273
3.3 RESEARCH QUESTIONS ...............................................................274
3.4 OPERATIONAL DEFINITIONS OF KEY TERMS .........................275
3.5 DELIMITATIONS AND LIMITATIONS OF THE STUDY .............282

CHAPTER 4 ..........................................................285
4.1 SAMPLING ..........................................................286
4.1.1 Phase I ..........................................................287
   A. Sampling of Sighted students in regular schools .......................287
   B. Sampling of Children with Visual Handicap in Special Schools ....288

4.1.2 Phase II: Selection of Children with Visual Handicap for Diagnostic Evaluation of Arithmetic Skills and Data on Cognitive Capabilities ....290

4.1.3 Phase III: Selection of Special Institutions for the Appraisal of Arithmetic Curriculum ..........................................................291

4.2 TOOLS AND TECHNIQUES OF THE STUDY .........................294
4.2.1 Arithmetic Diagnostic Test (ADT) ...........................................294

   4.2.1.1 Rationale ..........................................................294
   4.2.1.2 Construction of ADT ................................................297
   A. Development of test items .................................................301
   B. Suitability of the test items ..............................................302
   4.2.1.3 Judging the content validity .......................................303
   4.2.1.4 Pilot Study ..........................................................303
   4.2.1.5 Finalisation of ADT ..................................................304
   4.2.1.6 Procedure for Administration and Scoring the ADT for the Sighted ....308
   A. Administering the test ......................................................308
   B. Scoring of ADT ............................................................309
   4.2.1.7 Adaptation of Arithmetic Diagnostic Test for CVH ............309
   A. Pilot Study ..............................................................309
   B. Selection of Modalities for administering the test ...................311
   C. Procedure for administering the test ..................................314

4.2.2 Cognitive Capabilities Test .................................................316

   4.2.2.1 Rationale ..........................................................316
   4.2.2.2 Development of Cognitive Capabilities Tasks – Children with Visual Handicap ..........................317

   4.2.2.3 Description of Tasks ...............................................320
   A. Classification ............................................................320
   B. Seriation .................................................................321
   C. Conservation of Number ................................................324
   D. Conservation of Quantity – Clay ......................................326

   4.2.2.4 Administering the Test .............................................327

4.2.3 Technique for Appraisal of Arithmetic Curriculum ............328

4.3 COLLECTION OF DATA ....................................................330
4.3.1 Collection of Data on ADT with respect to Sighted Children ....330
4.3.2 Collection of Data on ADT with respect to CVH .................................................. 332
4.3.3 Collection of Data on Cognitive Capabilities Tasks ........................................... 332
4.3.4 Collection of Data on Arithmetic Curriculum .................................................... 333

CHAPTER 5 .................................................................................................................. 335

5.1 COMPARATIVE ANALYSIS OF ARITHMETIC ACHIEVEMENT .......................... 337
5.1.1 Analysis of Overall Arithmetic Achievement – between Sighted and CVH ........... 337
5.1.2 Analysis of Overall Arithmetic Achievement – comparison based on nominal groups .............................................................................................................. 340
5.1.3 Analysis of Overall Arithmetic Achievement – Gender Differences ................ 343
5.1.4 Analysis of Arithmetic Achievement – Main areas and Task wise .................... 344
   • A. Analysis of arithmetic competencies – main areas ........................................... 345
   • B. Analysis of arithmetic competencies – task-wise ............................................ 347

5.2 DIAGNOSTIC ANALYSIS OF PERFORMANCE OF CHILDREN WITH VISUAL HANDICAP ON ARITHMETIC DIAGNOSTIC TEST ........................................... 353

5.2.1 Error Analysis – Area: Number ........................................................................ 355
   • 5.2.1.1 Error Analysis on Number – Counting ................................................. 355
   • 5.2.1.2 Error Analysis on Number – Odd and Even Numbers ................................ 357
   • 5.2.1.3 Error Analysis on Number – Completion of Series .................................. 359
   • 5.2.1.4 Error Analysis on Number – Ascending and Descending Order ............... 361
   • 5.2.1.5 Summary on Responses – Number .......................................................... 363

5.2.2 Error Analysis – Area: Place Value .................................................................. 365
   • 5.2.2.1 Error Analysis on Place Value – Naming Numbers .................................... 366
   • 5.2.2.2 Error Analysis on Place Value – Expansion of Numbers ............................ 368
   • 5.2.2.3 Error Analysis on Place Value – Identification of Numbers ..................... 370
   • 5.2.2.4 Error Analysis on Place Value – Formation of Numbers .......................... 372
   • 5.2.2.5 Summary on Responses – Place Value ................................................. 374

5.2.3 Error Analysis – Addition .................................................................................. 377
5.2.4 Error Analysis – Subtraction ............................................................................. 381
5.2.5 Error Analysis – Multiplication ......................................................................... 383
5.2.6 Error Analysis – Division .................................................................................. 385
5.2.7 Summary on Computational Skills ..................................................................... 387

5.3 CATEGORISATION OF ERRORS IN ARITHMETIC SKILLS AMONG ............... 390
5.3.1 Error Categories in Addition ............................................................................ 394
5.3.2 Error Categories in Subtraction .......................................................................... 400
5.3.3 Error Categories in Multiplication and Division ................................................ 404
5.4.1 Performance on Cognitive Capabilities Test – Whole Test .................. 413

5.4.2 Performance on Cognitive Capabilities Test – CVH – Taskwise .............. 416

5.4.2.1 Performance on Classification Task ........................................ 416
5.4.2.2 Performance on Seriation Task .............................................. 432

5.4.3 Performance on Cognitive Capabilities Test – CVH - Conservation Tasks ... 440

5.4.3.1 Performance on Conservation of Number .................................. 441
5.4.3.2 Performance on Conservation of Quantity ................................. 450
5.4.3.3 Comparison between conservation of number and conservation .......... 456

5.4.4 Attainment of Concrete Operational Stage ..................................... 458

5.5 APPRAISAL OF ARITHMETIC CURRICULUM WITH RESPECT TO CVH .... 460

5.5.1 Descriptive analysis of classroom observations .................................. 465

5.5.2 Descriptive analysis of responses collected through structured and semi-structured interviews ................................................................. 470

5.5.2.1 Descriptive analysis of responses on items 2 to 6 ........................ 470
5.5.2.2 Descriptive analysis of responses on item 7b and c ......................... 473
5.5.2.3 Descriptive analysis’s of responses on item 7a and 9a ....................... 485
5.5.2.4 Descriptive analysis of responses on item 8 ................................. 495
5.5.2.5 Descriptive analysis of responses on item 10 ................................ 497
5.5.2.6 General observations .................................................................. 498

CHAPTER 6 .......................................................................................... 502

6.1 NATURE OF THE STUDY ................................................................. 503

6.2 FINDINGS OF THE STUDY ................................................................. 505

6.2.1 Findings on the Comparative Analysis of Arithmetic Achievement among the Sighted and CVH on ADT (Objective I) .............................. 505

6.2.2 Findings on diagnostic evaluation of performance of CVH on ADT (Objective II) ................................................................. 507

6.2.3 Categorisation of errors .................................................................. 513

6.2.4 Findings on analysis of cognitive capabilities of CVH (Objective III) .... 516

6.2.5 Findings on appraisal of arithmetic curriculum in special schools (Objective IV) ................................................................. 520

6.3 FINDINGS OF PERFORMANCE ON CCT IN RELATION TO FINDINGS OF PERFORMANCE ON ADT FOR CHILDREN WITH VISUAL HANDICAP ...... 521

6.4 EDUCATIONAL IMPLICATIONS OF THE STUDY .............................. 522

6.4.1 Implications for Inclusive/Integrated education setup .......................... 523

6.4.2 Implications for development of Arithmetic Skills among CVH at primary level .................................................................................. 525
6.4.2 Implications for development of Arithmetic Skills among CVH at primary level

6.4.2.1 Need for Curriculum Analysis for Children with Visual Handicap
6.4.2.2 Diagnostic - Remedial Teaching Methods/Strategies

6.4.3 Implications for teaching methods and strategies

6.4.3.1 Instructional Aids
6.4.3.2 Structuring Mathematical Understanding
6.4.3.3 Student involvement in learning

6.4.4 Implications for teacher training

6.4.5 Implications for development of cognitive capabilities among CVH

6.5 SUGGESTIONS FOR FURTHER RESEARCH

BIBLIOGRAPHY

APPENDICES

APPENDIX-I: Arithmetic Diagnostic Test (ADT)
APPENDIX-II: Mysore Cognitive Capabilities Test (MCCT)
APPENDIX-III: Proforma for Structured Interview – teachers in special institutions
APPENDIX-IV: Addition And Multiplication Bugs
APPENDIX-V: How To Write Arithmetic On Taylor Frame
APPENDIX-VI: Braille Mathematics Code For India
APPENDIX-VII: Classroom Observation – excerpt from diary
