# CONTENTS

## INTRODUCTION 1-4

## REVIEW OF LITERATURE 5-94

### NEUROPATHIC PAIN 5

- Neuropathic Versus Nociceptive Pain 6
- Characterization of Neuropathic Pain 8
- Pain Scales for Assessing Neuropathic Pain 10
- Classification of Neuropathy 11

### DIABETIC NEUROPATHY 13

- Definition 14
- Epidemiology and Impact of Diabetic Neuropathy 16
  - Diabetic Polyneuropathy (DPN) 16
  - Diabetic Autonomic Neuropathy (DAN) 21
- Clinical Evaluation of Diabetic Neuropathy 25
- Pathogenesis of Diabetic Neuropathy 29
  - Polyol Pathway 30
  - Hexosamine Pathway 31
  - Protein kinase C Pathway 32
  - Advanced Glycation Endproducts Pathway 33
  - Poly(ADP-ribose) Polymerase Pathway 34
  - Oxidative Stress and Apoptosis 34
  - Inflammation 38
- Growth factors 39
- Therapeutic Strategies for Diabetic Neuropathy 41
  - Glycemic Control 41
    - Type 1 Diabetes mellitus 41
    - Type 2 Diabetes mellitus 44
  - Symptomatic Therapies 46
    - Diabetic Polyneuropathy 46
    - Diabetic Autonomic Neuropathy 46
  - Causal Therapies 54
    - Aldose Reductase Inhibitors 54
    - Hexosamine Pathway Modulators 57
    - Protein Kinase C Inhibitors 59
    - Advanced Glycation Endproducts Inhibitors 61
    - Poly(ADP-ribose) Polymerase Inhibitors 62
    - Antioxidants 62
    - Neurotrophic Factors 67
DIABETES ASSOCIATED COGNITIVE DECLINE

Definition 70
Insulin and Memory Consolidation 71
Neurobiology of Diabetic Encephalopathy 74
  Impaired Insulin Signaling 75
  Insulin like Growth Factors 76
  C-peptide 79
  Cerebral Glucose Transporters (GLUTs) 79
  Cerebrovascular Alterations 80
  Hyperglycemia-induced toxicity 81
  Oxidative Stress 82
  Neurotransmitter Modulation in Diabetes 83
    Cholinergic Modulation 84
    Glutaminergic Modulation 85
    GABAergic Modulation 86

THERAPEUTIC INTERVENTIONS EMPLOYED IN THE STUDY 87
  Tocotrienol 87
  Lycopene 92
  Sesamol 93

AIMS AND OBJECTIVES 95-96

CHAPTER 1: AMELIORATION OF DIABETIC NEUROPATHY:
TARGETING OXIDATIVE-NITROSATIVE STRESS AND
INFLAMMATORY CASCADE 97-146
  1.1. Introduction
  1.1. Materials and Methods
  1.1. Results
  1.1. Discussion

CHAPTER 2: ROLE OF OXIDATIVE-NITROSATIVE STRESS
AND INFLAMMATORY CASCADE IN THE DEVELOPMENT OF
DIABETES ASSOCIATED COGNITIVE DECLINE 147-154
  2.1. Introduction
  2.1. Materials and Methods
  2.1. Results
  2.1. Discussion

SUMMARY AND CONCLUSIONS 189-191

BIBLIOGRAPHY 192-272
