<tbody>
<tr>
<td>3.1</td>
<td>Table showing detail of the sample for the final study</td>
<td>95</td>
</tr>
<tr>
<td>3.2</td>
<td>Table showing coding system used for different variables involved in the present study</td>
<td>120</td>
</tr>
<tr>
<td>4.1</td>
<td>Table showing value-wise allocation of items included in the six parts of the preliminary draft of moral judgement test</td>
<td>125</td>
</tr>
<tr>
<td>4.2</td>
<td>Table showing name of students, institutions along their number of correct responses and time taken in case of preliminary try out of the MJT</td>
<td>129</td>
</tr>
<tr>
<td>4.3</td>
<td>Table showing names of the schools/colleges alongwith number of students taken for final try out of MJT</td>
<td>131</td>
</tr>
<tr>
<td>4.4</td>
<td>Table showing item number, number of students responding correctly to that item and the difficulty value of the item for final try out of MJT(N=250)</td>
<td>133</td>
</tr>
<tr>
<td>4.5</td>
<td>Table showing number of correct responses alongwith item no., for the higher group and the lower group, for final try out of the MJT(N=250)</td>
<td>135</td>
</tr>
<tr>
<td>4.6</td>
<td>Table showing distribution of items for their difficulty value and discriminative value for final try out of MJT</td>
<td>138</td>
</tr>
<tr>
<td>4.7</td>
<td>Table showing sequence of items selected for final MJT with their difficulty and discriminative value</td>
<td>142</td>
</tr>
<tr>
<td>4.8</td>
<td>Table showing serial number of items in the final form of the MJT bearing correspondence with the serial number in the final try out of the MJT explaining the moral values.</td>
<td>144</td>
</tr>
</tbody>
</table>
Table showing mean, median, SD, Sk and Ku for the two administrations of the MJT (N = 50)  

Table showing values of mean, median, SD, Sk, Ku for the measure of MJ and 6 measures of SCI, SES, 7 measures of FRI, Int., mother moral dilemma, father moral dilemma, 9 measures of SOCDQ, OSC and teacher moral dilemma  

Table showing values of coefficient of correlations between personal and educational environmental variables and criterion variable of moral judgment (Group I: Urban Sample)  

Table showing values of coefficient of correlations between personal and educational environmental variables and criterion variable of moral judgment (Group II: Rural Sample)  

Table showing principal axes factor matrix (Urban Sample)  

Scree test for number of factors (urban sample)  

Table showing varimax factor matrix (urban sample)  

Table showing significant loadings on original and varimax factor I in descending order (Urban sample)  

Table showing significant loadings on original and varimax factor III in descending order (urban sample)  

Table showing significant loadings on original and varimax factor V in descending order (urban sample)  

Table showing percentage of variance explained by variables of moral judgment, personal variables and variables of home and school environment in each original factor in case of urban sample  

Table showing percentage of variance explained by the variables of moral judgment, personal variables and variables of home and school environment in each varimax factor in case of urban sample
6.11 Table showing principal axes factor matrix (rural sample) 216
6.12 Scree test for number of factors (rural sample) 217
6.13 Table showing varimax factor matrix (rural sample) 218
6.14 Table showing significant loadings on original and varimax factor I in descending order (rural sample) 219
6.15 Table showing significant loadings on original and varimax factor III in descending order (rural sample) 221
6.16 Table showing percentage of variance explained by the variable of moral judgement, personal variables and variables of home and school environment in each original factor in case of rural sample 223
6.17 Table showing percentage of variance explained by the variable of moral judgement, personal variables and variables of home and school environment in each varimax factor in case of rural sample 224
6.18 Table showing variables' symbols as entered in regression equations for urban and rural sample 234
6.19 Table showing R between independent variable of intelligence and criterion variable of moral judgement (urban sample) 237
6.20 Table showing R between independent variables of intelligence, family relationship total and criterion variable of moral judgement (urban sample) 237
6.21 Table showing R between independent variables of intelligence, family relationship total, school characteristics III and criterion variable of moral judgement (urban sample) 238
6.22 Table showing R between independent variables of intelligence, family relationship total, school characteristics III, FRL-MC and criterion variable of moral judgement (urban sample) 238
Table showing $R$ between independent variables of intelligence, family relationship total, school characteristics, $FRI-MA_y$, and criterion variable of moral judgement (urban sample).

Table showing $R$ between independent variables of intelligence, family relationship total, school characteristics, $FRI-MA_y$, and criterion variable of moral judgement (urban sample).

Table showing $R$ between independent variables of intelligence, family relationship total, school characteristics, $FRI-MA_y$, $FRI-MA_y$, and criterion variable of moral judgement (urban sample).

Table showing $R$ between independent variables of intelligence, family relationship total, school characteristics, $FRI-MA_y$, and criterion variable of moral judgement (urban sample).

Table showing $R$ between independent variables of intelligence, family relationship total, school characteristics, $FRI-MA_y$ and criterion variable of moral judgement (rural sample).

Table showing $R$ between independent variables of intelligence, $FRI-FA$ and criterion variable of moral judgement (rural sample).

Table showing $R$ between independent variables of intelligence, $FRI-FA$, father moral dilemma, and criterion variable of moral judgement (rural sample).

Table showing $R$ between independent variables of intelligence, $FRI-FA$, father moral dilemma, $FRI-FA_y$ and criterion variable of moral judgement (rural sample).

Table showing $R$ between independent variables of intelligence, $FRI-FA$, father moral dilemma, $FRI-FA_y$, school characteristics total, and criterion variable of moral judgement (rural sample).
6.32 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, school characteristics total, family relationship total and criterion variable of moral judgement (rural sample) 251

6.33 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, school characteristics total, family relationship total, SCIIV and criterion variable of moral judgement (rural sample) 252

6.34 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA and criterion variable of moral judgement (rural sample) 252

6.35 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA, mother moral dilemma and criterion variable of moral judgement (rural sample) 253

6.36 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA, mother moral dilemma, FRI-MAy and criterion variable of moral judgement (rural sample) 253

6.37 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA, mother moral dilemma, FRI-MAy, SCIIV and criterion variable of moral judgement (rural sample) 254

6.38 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA, mother moral dilemma, FRI-MAy, SCIIV, FRI-MC and criterion variable of moral judgement (rural sample) 255

6.39 Table showing R between independent variables of intelligence, FRI-FA, father moral dilemma, FRI-FAy, SCIIV, FRI-MA, mother moral dilemma, FRI-MAy, SCIIV, FRI-MC, FRI-FC and criterion variable of moral judgement (rural sample) 256

6.40 Table showing the significance of difference between means of moral judgement of urban senior secondary students due to personal variables 276
6.41 Table showing the significance of difference between means of moral judgement of urban senior secondary students due to educational environmental variables 277

6.42 Table showing the significance of difference between means of moral judgement of rural senior secondary students due to personal variables 278

6.43 Table showing the significance of difference between means of moral judgement of rural senior secondary students due to educational environmental variables 279

6.44 Table showing the significance of difference between means of moral judgement of urban and rural senior secondary students 280
