ACKNOWLEDGEMENT
I would like to take this opportunity to express my earnest gratitude to all those special people who have in different ways contributed in completing my research work.

First of all, I take this great opportunity to express my gratitude and indebtedness towards my beloved Supervisor Professor A. Raghuram Rao, an eminent teacher and connoisseur in the field of pharmaceutical chemistry. It is my privilege to have been associated with him for the past four years as his doctoral student. During these years, I have developed a special veneration to my supervisor who is compassionate in nature and committed to his profession. I always perceive a quixotic and impeccable grandeur in every aspect of his life. His integral view and mission for quality research were a boon to his students since he was ever ready to provide all the research facilities at his students' disposal. His inspiration, moral support and care during tricky times went a long way in the successful execution of my research protocols. His research approach, benevolent character and his integrity to his calling stand as bastions in one’s profession. The days spent with him and his gracious family members have left an indelible impression in my heart which I will cherish throughout my life ahead.

I sincerely thank Professor V. R. Sinha, Chairperson, University Institute of Pharmaceutical Sciences (UIPS), Panjab University, who has always given me wholehearted support and encouragement for my research work by providing all the facilities that lead to successful completion of my project. I convey my great sense of gratitude and respect to him.

I am extremely thankful and indebted to my co-supervisor Professor Renu Chadha, Head of the Department, Pharmaceutical Chemistry, UIPS, Panjab University, for her constant encouragement, support and valuable suggestions.

I thank Professor O. P. Katar, Ex-Chairperson and Professor Karan Vasishth, Ex-Chairperson, UIPS, Panjab University for their encouragement and cordial nature. They were always available when I needed their advice.

I am thankful to all the faculty members, especially Professor Tilak Raj Bhardwaj, Professor B. S. Bhoop, Dr. Manoj Kumar, Dr. Ranju Bansal, Dr. Poonam Piplani and Dr. Neelima Dhingra for constant encouragement and unwavering support.
I express my deep sense of respect and gratitude towards my venerated mentor who has
ocean of patience and affection towards all his students, i.e. Dr. M. Raghur Prasad, Sri Vishnu
College of Pharmacy, Vishnupur, Bhimabaram, Andhra Pradesh for writing my Ph.D. project. He
always stood beside me wherever I found any problem and helped me with his valuable suggestions
and advice. His guidance, supervision, and crucial contribution made him a backbone of this
research and so to this thesis. He not only gave a right direction to the execution of this work, but
also contributed to my personal grooming as a researcher. I am short of words to thank him for his
unlimited patience, help and affection bestowed upon me during my entire research work.

I would like to thank Dr. Kunal Roy, Drug Theoretics and Cheminformatics Laboratory,
Department of Pharmaceutical Technology, Jadavpur University, Kolkata; Dr. G. Naraahari
Sastry, Indian Institute of Chemical Technology, Hyderabad; Professor P. V. Bharatham,
National Institute of Pharmaceutical Education and Research, Mohali; Dr. M. Rav Kumar,
Schrodinger Inc. for providing the constant encouragement during the computational work.

I would like to express my special gratitude to Professor Prof. K. N. Klotz, Department of
Pharmacology and Toxicology, University of Wuerzburg, Germany for providing facilities for in
vitro pharmacological studies. I also thank Professor Kamaljit Chopra, Head of the Department,
Pharmacology, University Institute of Pharmaceutical Sciences, Panjab University for providing
all the necessary facilities to carry out the anti-inflammatory studies, mast cell protection studies,
and bronchodialatory studies by using guineapig tracheal chain preparation.

During this work, I have coordinated with many colleagues for whom I have great regard,
and I wish to extend my warmest thanks to all those who have helped me with my work. I
specially thank Miss. Rajwinder Kaur, Women Scientist, DST; Mr. Venkat Rao Kaki, Senior
Research Fellow, CSIR, Mr. Balakumar, Senior Research Fellow, UGC and Mr. Basant, Senior
Research Fellow for their constant encouragement, unwavering help and support. I do express my
appreciation to Mr. Lakshminarayana, Mr. V. Raj Kumar, Mrs. Mamtta, Mr. Shanthanu, Dr.
Amit Bhatia, Mr. Pratap, Mr. Chanda, Mr. Neeraj, Mr. Varun, Mr. Atin, Mr. Ansuman, Mrs.
Anupam, Dr. Poornam, Dr. A. Kiran Kumar, Dr. Hariksh, Mr. Lalit, Mr. Puneet, Mr. Jitendra,
Mr. Ashish Jena, Mr. Mahaveer, Mr. Kaiser, Dr. Upendra Jain, Mr. Maneesh, Mr. Honey and
Mr. Peter for being some of my best seniors, colleagues and friends. I also thank my juniors Mona, Sangeeta, Annie, Shailza, Dilshad, Amuradha, Anita, Preeti, Varun, Rahul, Dimpy, Neha and Divya for their wonderful cooperation.

I would like to express my sincere thanks to members of Central Instrumentation Laboratory especially Mr. Avtar Singh for his help rendered in carrying out NMR spectral analysis during this work. It is impossible to forget technical help and cooperation extended to me by Mrs. Ranjit Kaur, Mr. Shaadi Lai, Mr. Dharam Chand, Mr. Kishori Lai, Mr. Ravinder, Mr. Rama Shankar, Mr. S. Sethi and Mr. Susheel. I also express particular thanks to Mr. P.D. Choudhary, Librarian, and Mr. Dayal Chand, Asst. Librarian for their kind cooperation.

I gratefully acknowledge the Council of Scientific and Industrial Research (CSIR), New Delhi, for awarding the Senior Research Fellowship (SRF) [sanction no. 09/135/(0334)/2008/EMR-I dated 18/03/2008] to carry out the research work and Foreign Travel Grant for attending and presenting our research work at International Symposium on Challenges in Organic Chemistry and Chemical Biology (ISACS1), organized by Royal Society of Chemistry (RSC), San Francisco, USA, July 6-9, 2010. I also thank Department of Science and Technology (DST), New Delhi for providing me the Foreign Travel Grant to attend and present our research work at the 243rd ACS National Meeting, San Diego, California organized by American Chemical Society in San Diego, California, March 25-29, 2012.

I take this opportunity to express my hearty gratitude and thanks to one and all who are directly or indirectly involved in the completion of this dissertation work.

I cannot finish without saying how grateful I am to my Father Dr. Purnendu Kumar Deb, my mother Mrs. Annapurna, my brother Ardhendu Kumar Deb and my sister Dr. Piyalee Deb as without their love, prayers, selfless sacrifice and constant encouragement, my dream could not be realized.

Finally, I thank God Hare Krishna for giving me the mental, physical and emotional strength to complete the task successfully.

Date: 26/07/2012

Pran Kishore Deb
